MindUP

Understanding our brains can make a huge difference! Kids love seeing the "brain" (cauliflower) and learning about the amygdala that helps us when in danger, but often is in "overdrive" even when there is no danger around, thus making us feel anxious and upset. The concept of mindfulness (paying attention to the here and now and being nonjudgmental) will be introduced and practiced. Learn these skills through games, role-playing, and movement.

"MindUP" is an evidenced based, social and emotional program of The Hawn Foundation built upon neuroscience, positive psychology, mindful awareness training, and optimism. The "MindUP" curriculum uses research-based lessons with the latest information about the brain to improve behavior and learning. It is shown to enhance perspective taking, empathy, and kindness, as well as fostering complex problem solving skills. Learn more about "MindUP"
