

APPENDIX A: COMMUNITY ENGAGEMENT

Summary of Input

Eric Lusher, Consultant Team member, presented information on the process and schedule, noting that there would be a phased approach, including an existing conditions inventory, needs assessment, evaluation and recommendations, and prioritization of the recommendations. He indicated the study will continue through the spring of 2018.

Mr. Lusher then discussed the overall planning process (see Attachment A) with focus on the outreach component, including five events with the Stakeholder Committee (SAC) at appropriate technical milestones (beginning with this Listening Session), and public outreach including traditional meetings and pop up events. He further noted that the role of the SAC will be to vet ideas and processes and to build consensus. He then asked the group if there were other people/organizations that need to be included on the SAC. Responses from the group indicated that GDOT representation would be helpful, specifically from planning, the area office, and bike/ped coordinator. Other suggestions included MARTA, Fulton County, and the Mayor of the City of South Fulton.

The group decided that the SAC should be agency/jurisdictional focused. Outreach to owners of adjacent properties and those that are ready for development that might have an interest in the study would best be handled through the general community engagement or by the local jurisdictions.

Mr. Lusher then reviewed information contrasting access and mobility (see Attachment B), noting that mobility related to faster speeds (getting people through the corridor) contrasted with accessibility meant slower speeds with more access to adjacent properties. Mr. Lusher then asked Pat Smeeton, Consultant Team member, to discuss the project vision and goals. Mr. Smeeton stated that the team was looking for input on the overarching vision for the corridor and to understand desired outcomes for the planning effort. He stated that the vision will drive project goals and objectives for the long term vision of the corridor. Mr. Smeeton invited SAC members to go around the room to provide their input.

The following items were mentioned as vision input for the corridor:

- Safe and secure
- Aesthetically pleasing
- Adds value
- An economic development corridor
- Not to the detriment of the community or businesses
- Access management
- Multi-use trails
- Early deliverables/successes
- Projects ready for ARC's schedule for quick implementation
- Protect Level of Service – Maintain or enhance
- Recognize the entrance into Fayette County, notice how nice it is
- Enhance the entire corridor from I-85 to Peachtree City
- Incorporate previously planned intersection improvements:
 - SR 54 @ SR 74
 - I-85 @ SR 74

SR 74 COMPREHENSIVE CORRIDOR STUDY

SR 74 Gateway Coalition Listening Session
June 20, 2017

- Overlay zoning to control development
- Mobility – 70% of workforce leaves Fayette County for employment
- Accessibility – perhaps access road for development
- Development of a blueprint for aesthetics and development areas along the corridor and intersections
- Bike paths
- Connectivity and pedestrian compatibility from I-85 to SR 54
- Consistent signage and aesthetics throughout corridor
- Transit
- Access points to pocket parks, library, trails, etc. via trails
- Balanced use of corridor for everyone/all modes
- Access management for locals – in Fairburn, Peachtree City commuters are mixed with Fairburn residents
- Controlled development in Fairburn area – don't let development get out of hand, at least until the City can support the growth with appropriate infrastructure
- Opportunities to reduce single occupancy vehicles
- Shuttles to Park and Ride Lots, Van Pools, Ride Sharing
- Access management to keep the corridor moving
- Look into untapped funding sources to add value
 - Is GRTA shuttle eligible for 5307 funding?
- Gateway project for Fayette County
- Interparcel access management in Tyrone
- Quality growth, with the overlay in place
- Economic development factors
 - Working with developers on how we can handle the impact to traffic/transportation
 - Developers need to handle traffic internally to keep traffic off of the corridor
- Architectural and landscape standards in the overlay to preserve and maintain an aesthetically pleasing corridor
- Mobility
- Aesthetically pleasing – keep it green
- Coordinated signage
- Improve traffic flow on 74
- Half diamond interchange at SR92 and I-85
- Might be able to use analysis from this project to help justify new/alternative corridors/ways to access I-85
- Smart corridor as much as possible – benefits of intelligent signals, etc.
- Car flow from Coweta into Fayette County pressures Peachtree City and Tyrone
- Interchange with I-85 would be great near Gullatt or Johnson Road. There is a long stretch between interchanges.
- Truck only access
- Freight is an issue near the interchange with I-85 but not elsewhere along the corridor
- Frontage roads/access roads/new interchange will help limit curb cuts but add mobility and accessibility

ACCESS & MOBILITY

SR 74 COMPREHENSIVE CORRIDOR STUDY

SR 74 Gateway Coalition Listening Session
June 20, 2017

Location

Town of Tyrone Chambers
881 Senoia Road
Tyrone, GA 30290

Attendees

Carlotta Ungaro, Fayette County Chamber of Commerce
Daniel Studdard, Atlanta Regional Commission
Edlin Regis, GDOT
Ellis Still, City of Union City
Mayor Eric Dial, Town of Tyrone
Harland Smith, GDOT
Hattie Portis-Jones, City of Fairburn
Joddie Gray, AICP, South Fulton CID
Jonathan Rorie, City of Peachtree City
Lester Thompson, City of Fairburn
Mark Sanders, South Fulton CID
Mike Warrix, City of Peachtree City
Pete Frisina, Fayette County
Phil Mallon, Fayette County
Phillip Trocquet, Town of Tyrone
Roshni Lawrence, GDOT
Ryan Sager, MARTA
Stanford Taylor, GDOT
Steve Rapson, Fayette County
Tarika Peeeks, City of Fairburn
Mayor Vanessa Fleisch, City of Peachtree City

Summary

The meeting format included a brief presentation which allowed for questions and comments throughout. After the presentation, the Committee was engaged in an activity to gain feedback on the vision for the corridor before adjourning.

A welcome was issued by Town of Tyrone Mayor Dial who thanked everyone for coming and being involved. Phil Mallon, Fayette County Engineer, also thanked the group for coming and informed the Committee that he is acting as the point of contact for the project team. Mr. Mallon emphasized that this is everyone's project and belongs to all municipalities. The group will make sure the finished project meets the needs of all.

Presentation

Eric Lusher, from Pond began the presentation, which is provided in **Attachment A**. He stated that this meeting will focus on a review of some of the work completed to date and a discussion with

the Committee on goals and objectives. Mr. Lusher gave some history on the SR 74 Gateway Coalition and what occurred at the last meeting, which was a listening session with the Coalition members. This is the first official meeting of the Stakeholder Advisory Committee, which goes beyond the Gateway Coalition to get broader input. Mr. Lusher mentioned that there will be additional opportunities to give input into the process throughout the study timeline.

Mr. Lusher presented the schedule and general timeline of the project. Currently, the study is identifying and establishing existing conditions, land use, transportation, and access management. A Needs Assessment will begin in the fall when the Team will begin thinking about current and future needs. In the winter the Team will enter the evaluation phase when alternatives that have incorporated the public's ideas will be presented. During this phase, the Team will be evaluating and prioritizing ideas. In the spring, the Team will present final recommendations and will complete the final report. Mr. Lusher also talked about the public engagement process such as meetings and other outreach throughout the process. He invited the Committee to give feedback on opportunities to interact with the public.

Next, Mr. Lusher talked about current and projected population and employment. In 2014, the data shows growth in employment and some densification of population. There is an expectation of growth along the corridor. Commuter patterns show commute times for Fairburn, Tyrone and Peachtree City. Mr. Lusher mentioned that commuter patterns show a big pull in the direction of Atlanta/central Atlanta, which puts a strain on SR 74 for those commuting out.

Mr. Lusher then discussed the Traffic Demand Model outputs to date. Traffic flows show traffic demands along SR 74. The model predicts a fairly significant amount of additional traffic in the corridor. The Team will dig into this data more during the Needs Assessment. Mr. Lusher stated that this tool is a pretty modest estimation. He also presented a graphic that shows future and existing truck travel, per the ARC travel demand model.

Mr. Lusher then discussed historical and projected traffic using GDOT traffic counts. The Team examined four locations and looked at the correlation between time of day and traffic patterns. This data differs some from model. There are a variety of assumptions built into using both the model and the GDOT traffic counts as a mechanism for projecting future travel demand. Mr. Lusher stated that the Team is looking at this from a variety of different angles. As the Team thinks about land use it will have an impact on what is considered reasonable traffic growth.

Next, Mr. Lusher presented information on Level of Service (LOS). He stated that a LOS D at peak times is acceptable, however, we want to avoid LOS E and F. The Model prediction shows the interchange with I-85 as a hot spot. Mr. Lusher reminded the group that the information presented gives us a general idea of LOS from a "30,000 foot view". When the Team examines LOS at an intersection level, it is expected that we will find more congestion.

Next, Mr. Lusher discussed Access Management. Thus far, the study has given the Team a good understanding of where access points are concentrated, as well as where there is a lack of density in access points. The Team will dig deeper into this more during the Needs Assessment phase and will offer alternative solutions to deal with access along the SR 74 corridor. Likewise, the Team will form a greater understanding of Land Use along SR 74 as more information is

compiled and evaluated through GIS. The focus now is on the Character Areas. For the cities that actually touch the corridor, Mr. Lusher and Team highlighted the future development maps and character areas for each and mapped them to see if there were any thematic similarities and/or differences from one to the next. This analysis indicated that there are differences in how each community treats the corridor. Mr. Lusher encouraged the Committee to think about how all of these differences can work together.

Vision Exercise

Pat Smeeton of Pond provided the Committee with an overview of what we heard during the June listening session with the Coalition. This information will be used to help develop a cohesive vision. The information collected during the listening session was presented as a word cloud that the Team then organized into six categories, which will be used as to help draft the Vision for the corridor.

- Access Management – curb cuts, etc.
- Accessibility – how easy it is to get from point A to B. Includes new access.
- Aesthetics & Signage – cohesion and consistency of theme.
- Alternative Travel Modes – transit, shuttles, bike and ped facilities, etc.
- Development Patterns – controlled development and balancing growth with capacity.
- Mobility – your ability to move along corridor at a decent LOS (enhance or maintain) more capacity and operational improvements.
- Other

After creating the corridor vision, these categories will eventually evaluation criteria for measuring transportation and policy recommendations. Mr. Smeeton explained that the exercise and feedback today will help the Team prioritize and understand what is most important. The Team will use quantifiable and qualifiable criteria to judge and measure the projects against.

Before soliciting feedback, the Committee reviewed the Goals & Objectives and offered some additional ideas:

- Please consider including freight specific design and accommodating truck traffic
 - This will fit into the “Mobility” goal
- Please encourage greenspace along corridor as well as green vehicles and charging stations.
 - Greenspace will be included in the “Aesthetics & Signage” goal.
 - Green vehicles and charging stations will be included in the “Alternative Travel Modes” goal
- Include smart corridors and autonomous/connected vehicles
 - This can be included in the “Mobility” goal.

Committee members were given 10 dots to select the categories most important to them. The raw results are included in **Attachment B** and indicated in the table on the following page.

Vision Exercise Results

Category	Number of Dots	Relative Weighting
Access Management	42	20%
Mobility	42	20%
Accessibility	40	19%
Development Patterns	34	16%
Aesthetics and Signage	31	15%
Alternative Travel Models	22	10%

Mr. Smeeton wrapped up the discussion by stating that the Team will craft a vision statement based on this feedback, and will get back to group for consensus. Mr. Lusher added that the Committee will be invited to help wordsmith the vision. The goal is to act as one group and from a consensus perspective. The Vision will also be presented at the first public meeting for their input as well.

The next meeting of the Stakeholder Advisory Committee has not yet been scheduled but will occur at the next project milestone, likely in the fall.

POND

access management

- Implement corridor-wide access management policies to help maintain mobility.
- Implement access management practices such as frontage/backage/access roads and inter-parcel access to limit curb cuts on SR 74 while maintaining accessibility for residents and businesses.

accessibility

- Maintain or enhance accessibility/connectivity for residents and businesses without negatively affecting mobility.
- Identify new corridors and access points to I-85 to improve accessibility and mobility. Possible new I-85 interchange at SR 92, Gullatt Road, or Johnson Road.
- Improve pedestrian and bicycle access to corridor destinations and amenities (retail, downtowns, parks, libraries, etc.)

aesthetics and signage

- Implement corridor-wide design guidelines for both private development and transportation investments to ensure a cohesive, aesthetically pleasing corridor.
- Develop and implement consistent signage standards throughout corridor.
- Identify and install decorative treatments throughout the corridor to highlight SR 74 as a 'Gateway Corridor'.

alternative travel modes

- Identify and implement transportation projects that encourage alternative modes of travel including pedestrian, bicycle, and transit.
- Identify potential funding opportunities to fund shuttles, park and ride lots, van pools, and ride sharing.

development patterns

- Identify and adopt zoning and development standards that balance growth with roadway network capacity in order to maintain mobility.
- Encourage development patterns that help reduce automobile trips (mixed-use, transit oriented, etc.).
- Accommodate anticipated economic development without jeopardizing corridor mobility.

mobility

- Identify and implement transportation improvements that preserve or enhance traffic operations and travel times along the SR 74 corridor.
- Implement operational and capacity improvements to accommodate planned growth within the corridor.
- Implement 'Smart Corridor' technologies such as adaptive signal control, queue detection, intelligent transportation systems (ITS) to improve traffic operations and safety within the SR 74 corridor.

other

- Please identify any additional goals and objectives you feel should be included on your comment form and return to the planning team

Attachment B

Vision Exercise Raw Results

access management

- Implement corridor-wide access management policies to help maintain mobility.
- Implement access management practices such as frontage/backage access, reads and inter-gate access to limit curb cuts on SR 74 while maintaining accessibility for residents and businesses.

accessibility

- Maintain or enhance accessibility/connectedness for residents and businesses without negatively affecting mobility.
- Identify new connectors and access points to I-65 to improve accessibility and mobility. Possible new I-65 interchange at SR 92, Gullard Road, or Johnson Road.
- Improve pedestrian and bicycle access to corridor destinations and amenities (schools, developments, parks, libraries, etc.).

aesthetics and signage

- Implement corridor-wide design guidelines for both private development and transportation investments to ensure a cohesive, aesthetically pleasing corridor.
- Develop and implement consistent signage standards throughout corridor.
- Identify and install decorative elements throughout the corridor to highlight SR 74 as a 'Gateway Corridor'.

alternative travel modes

- Identify and implement transportation projects that encourage alternative modes of travel including pedestrian, bicycle, and transit.
- Identify potential funding opportunities to fund shuttles, park and ride lots, van pools, and ride sharing.

Summary

In March 2018, two open house meetings were held in conjunction with meetings for the Fayette County Comprehensive Transportation Plan Update. These meetings were open houses, with a series of boards on display (included in **Attachment A**), explaining the context of the study and giving attendees an opportunity to provide input through three activities.

In the first activity, participants were presented with the vision (goals and objectives) that were crafted based on input received at the listening session and during the earlier stakeholder meetings. They were provided dots and asked to place a dot next to each statement that they agreed with. Results of this activity are shown in the table to the right, with raw scans of the results in **Attachment B**.

The second activity was used to identify where the community perceived congestion to be worst. Participants were given three dots and presented with a map of the study area. They were asked to place the dots of the three areas where they experienced the most traffic congestion on the SR 74 corridor. At the meeting, participants were also advised that GDOT was working on projects to improve both the I-85 interchange and the intersection of SR 74 with SR 54. They were advised that because of these projects, their input would be most helpful if they placed their dots on the top three congested places other than those two locations. A map of dots placed at these

STATION: background

schedule & process

study purpose

The Fayette County Department of Public Works is embarking upon a comprehensive corridor study of State Route (SR) 74 from US Route 29 on the north end to SR 54 in Peachtree City. Serving as a primary commuting corridor in Fayette County, SR 74 carries over 36,600 vehicles per day. It is a heavily used corridor that traverses Fairburn, Tyrone, Peachtree City, and unincorporated Fayette County. SR 74 has been identified by previous planning efforts and studies as a corridor that is ripe for change. This Comprehensive Corridor Study will examine a 12 mile stretch of SR 74 from US Route 29 to SR 54 in Peachtree City. The study will establish a corridor vision that is supported by stakeholders and will set forth a plan for bringing the vision to reality.

The corridor is anticipated to continue to attract population and employment growth. In the images to the left, which compare 2010 population and employment with anticipated year 2040 conditions, the areas of blue represent population, with the intensity of the color indicating the relative amount of population anticipated in those areas. Likewise, the orange dots represent employment, with the size of each dot indicating the relative amount of employment in each location.

COMPREHENSIVE CORRIDOR STUDY

access management

do you agree?

- Implement corridor-wide access management policies to help maintain mobility
- Implement access management practices such as frontage/backage/access roads and inter-parcel access to limit curb cuts on SR 74 while maintaining accessibility for residents and businesses

accessibility/connectivity

- Maintain or enhance accessibility/connectivity for residents and businesses without negatively affecting mobility
- Identify new corridors and access points to I-85 to improve accessibility and mobility. Possible new I-85 interchange at SR 92/Gullatt/Johnson Road.
- Improve pedestrian and bicycle access to corridor destinations and amenities (retail, downtowns, parks, libraries, etc.)

maintain and improve corridor aesthetics

- Implement corridor-wide design guidelines for both private development and transportation investments to ensure a cohesive, aesthetically pleasing corridor
- Develop and implement consistent signage standards throughout corridor
- Identify and install decorative treatments throughout the corridor to highlight SR 74 as a 'Gateway Corridor'

seek opportunities to encourage and facilitate alternative travel modes

- Identify and implement transportation projects that encourage alternative modes of travel including pedestrian, bicycle, and transit
- Identify potential funding opportunities to fund shuttles, park and ride lots, van pools, and ride sharing

land use/development patterns

- Identify and adopt zoning and development standards that balance growth with roadway network capacities in order to maintain mobility.
- Encourage development patterns that help reduce automobile trips (mixed-use, transit oriented, etc)
- Accommodate anticipated economic development without jeopardizing corridor mobility.

mobility

- Identify and implement transportation improvements that preserve or enhance traffic operations and travel times along the SR 74 corridor
- Implement operational and capacity improvements to accommodate planned growth within the corridor.
- Implement 'Smart Corridor' technologies such as adaptive signal control, queue detection, intelligent transportation systems (ITS) to improve traffic operations and safety within the SR 74 corridor.

SR 74 congestion

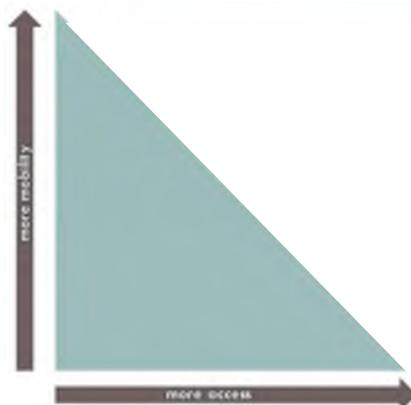

use either map below to tell us your top 3 locations to address traffic congestion on the SR 74 corridor...

Note: There are numerous proposed projects from the South Fulton CID Multimodal Study

STATION:

mobility & access

Corridor planning is often thought of in terms of mobility or access, two inversely related corridor treatments. For instance, freeways maximize mobility with access limited to only interchanges. In contrast, local streets maximize access with driveways and curb cuts to residential homes and businesses at the expense of mobility.

Initial discussions with area stakeholders suggest there are parts of the SR 74 corridor that we should implement design treatments that maximize for access and other areas we should maximize for mobility.

Prioritize Access?

access management

- Implement corridor-wide access management policies to help maintain mobility
- Implement access management practices such as frontage/backage/access roads and inter-parcel access to limit curb cuts on SR 74 while maintaining accessibility for residents and businesses

do you agree?

accessibility/connectivity

- Maintain or enhance accessibility/connectivity for residents and businesses without negatively affecting mobility
- Identify new corridors and access points to I-85 to improve accessibility and mobility. Possible new I-85 interchange at SR 92/Gullatt/Johnson Road.
- Improve pedestrian and bicycle access to corridor destinations and amenities (retail, downtowns, parks, libraries, etc.)

maintain and improve corridor aesthetics

- Implement corridor-wide design guidelines for both private development and transportation investments to ensure a cohesive, aesthetically pleasing corridor
- Develop and implement consistent signage standards throughout corridor
- Identify and install decorative treatments throughout the corridor to highlight SR 74 as a 'Gateway Corridor'

seek opportunities to encourage and facilitate alternative travel modes

- Identify and implement transportation projects that encourage alternative modes of travel including pedestrian, bicycle, and transit
- Identify potential funding opportunities to fund shuttles, park and ride lots, van pools, and ride sharing

land use/development patterns

- Identify and adopt zoning and development standards that balance growth with roadway network capacities in order to maintain mobility.
- Encourage development patterns that help reduce automobile trips (mixed-use, transit oriented, etc)
- Accommodate anticipated economic development without jeopardizing corridor mobility.

mobility

- Identify and implement transportation improvements that preserve or enhance traffic operations and travel times along the SR 74 corridor
- Implement operational and capacity improvements to accommodate planned growth within the corridor.
- Implement 'Smart Corridor' technologies such as adaptive signal control, queue detection, intelligent transportation systems (ITS) to improve traffic operations and safety within the SR 74 corridor.

Vivian Canizares, Georgia DOT Planning
Aileen Daney, Atlanta Regional Commission
Mayor Vanessa Fleisch, City of Peachtree City
Pete Frisina, Fayette County
Joddie Gray, AICP, South Fulton CID
Steven Gulas, South-Tree
Keith Larson, Bike Fayette
Jonathan Lynn, Town of Tyrone
Phil Mallon, Fayette County
Joe Robison, Fayette County
Mark Sanders, South Fulton CID
Kim Schnoes, Fayette Chamber
Mark Shugart, South Fulton CID; Saben
Andrew Spiliotis, Atlanta Regional Commission
Lester Thompson, City of Fairburn
Phillip Troquet, Town of Tyrone
Mike Warrix, City of Peachtree City

Summary

The third stakeholder committee meeting of the SR 74 Comprehensive Corridor Study was held on **Thursday, June 21st, 2018** at the Tyrone Public Library from 1:00 pm -2:30 pm. Facilitated by members of the consultant team (Pond and Sycamore), the meeting included an introduction by Fayette County Public Works Division Director, Phil Mallon, presentation by project manager Eric Lusher, as well as an activity geared at examining additional opportunities along the corridor. A sign-in from the meeting is provided in **Attachment A**, and materials from the meeting are included in **Attachment B**.

Presentation

The meeting began with a formal presentation by Pond Project Manager, Eric Lusher, to the stakeholder committee. The presentation included a status update of the SR 74 Corridor Study, a review of initial findings from the technical analyses and community outreach, as well as potential treatments and other improvements along the corridor.

Since the stakeholder committee meeting and first round of public meetings, much of the data collected has remained consistent. Access management, accessibility, and mobility are the most important types of improvements desired along the SR 74 corridor. Given these concerns and the level of growth expected along the corridor, the project team utilized GDOT's Intersections Control Evaluation (ICE) tool to evaluate potential improvements along the corridor. The emerging concept presented to the stakeholder committee is a Restricted Crossing U-Turn Intersection (RCUT), also referred to as a Superstreet. Through the technical analyses conducted, Mr. Lusher underscored that having a combination of R-Cut, J-Turn and Median U-Turn intersections will enhance and control flow on SR 74; provide an opportunity for safer pedestrian and bicycle crossings; and will work best as a corridor wide treatment. Several animations and case studies of RCUTs were shown to provide the Stakeholder Committee with more context on the effect superstreets can have in reducing conflict points and facilitating mobility.

Interactive Exercise

Following the presentation, the stakeholder committee was asked to break out into groups at three tables, each of which presented an aerial showing a segment of the corridor. For each segment, attendees were encouraged to provide any additional feedback or concerns they had for the corridor directly on the corridor aerrals. The project team will take these comments into consideration when developing recommendations. Scans of the segments along with comments from the committee are shown in **Attachment C**. Following the exercise, the group reconvened to discuss any additional concerns and questions on either the emerging concept and/or corridor in general. The concerns raised were:

- How would the concept impact the flow of truck traffic?
- How would dual left or dual right turn lanes impact drivers trying to access the interstate?
- How will this plan impact the bike plan for the intersection?
- Is it possible to re-route trucks in the opposite direction on Oakley Industrial?
- Could we push the turn lane back to allow more stacking for trucks approaching this intersection?
- How would not implementing this treatment at the intersection impact the corridor?

Next Steps

The project team will conduct further analysis to adequately address the feedback provided by the stakeholder committee. The last round of community meetings will be held on **Tuesday, July 10th, 2018** and **Thursday, July 19th, 2018**. A final stakeholder meeting has been tentatively scheduled for **August 2018** to present and finalize recommendations before the draft report is submitted in late August.

GDOT ICE Tool

- Team utilizing GDOT Intersection Control Evaluation (ICE) tool to evaluate proper control, safety and innovative intersection concepts for corridor
 - Corridor application of RCUT/Superset street intersections seems to emerge

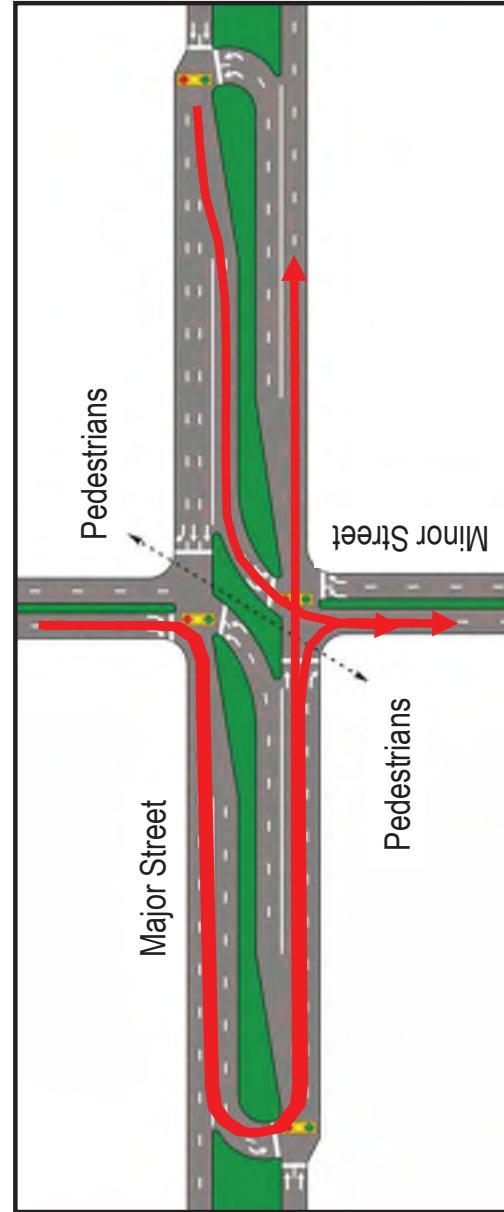

COMPREHENSIVE CORRIDOR STUDY

SR 74

RCUT / Superstreet

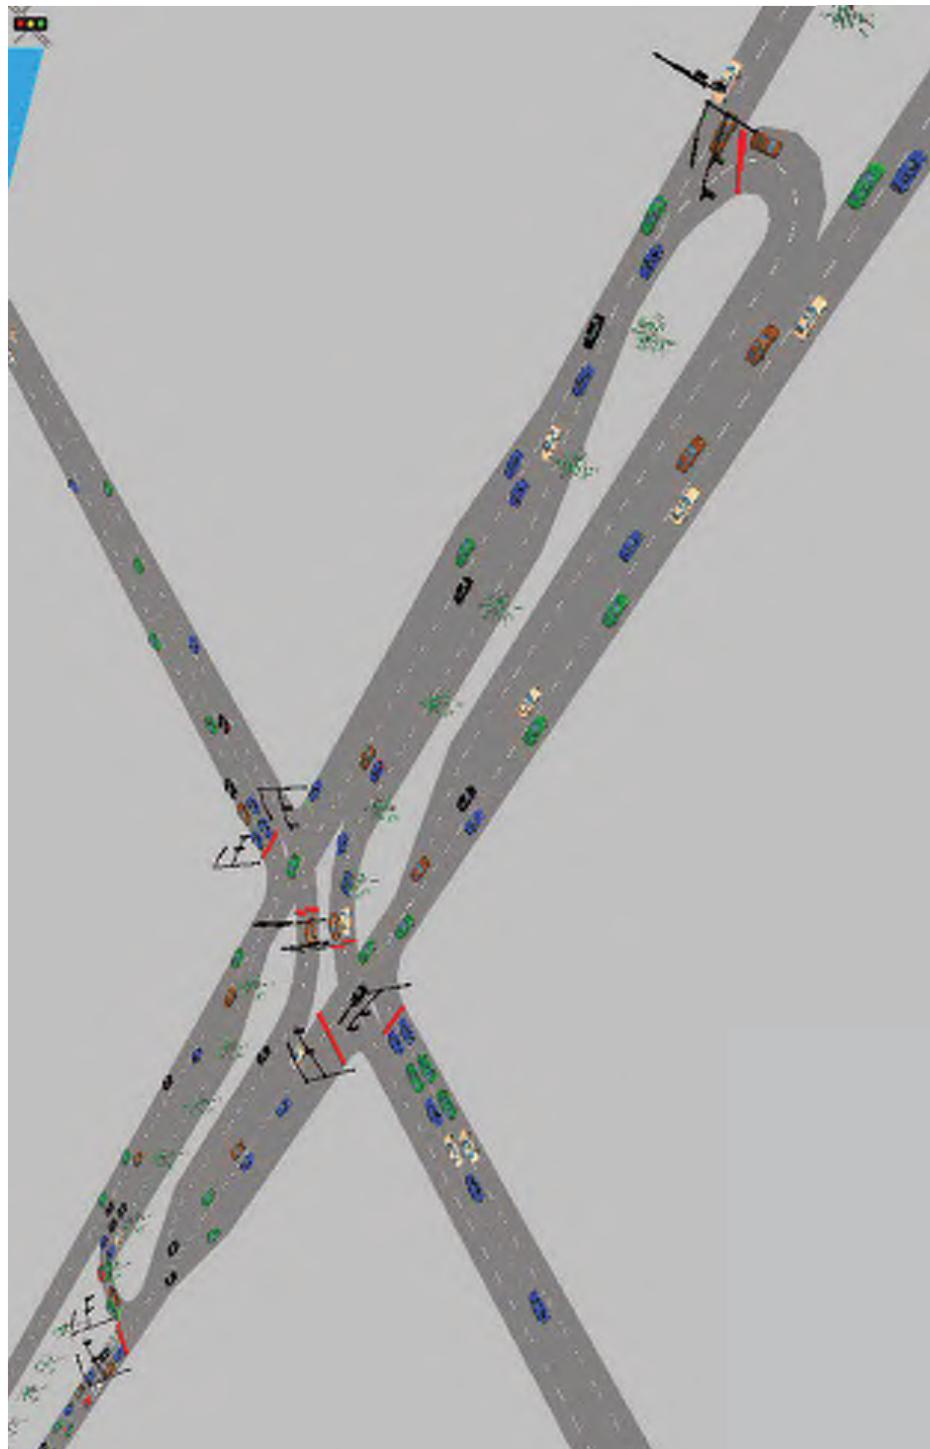

- U-turns in wide median serve Major ST lefts, Minor ST thru/left movements
- Independent signals in each direction on Major ST allows perfect progression
- Two-phase signal means more Major Street thru/left green time
- Greater minor street thru/lefts travel time using median U-turns
- Similar to widely used mid-block “leftover” concept

POND

RCUT / Superstreet

POND

COMPREHENSIVE CORRIDOR STUDY

SR 74 at Oakley Industrial Blvd

Median U-Turn

- Left-turns via one-way U-turn crossovers in wide median
- Major and Minor ST vehicles “turn right to go left”
- 2-phase signals at all Main and U-turn intersections
- Main and crossover signals coordinated
- Great corridor access management; widely used in MI

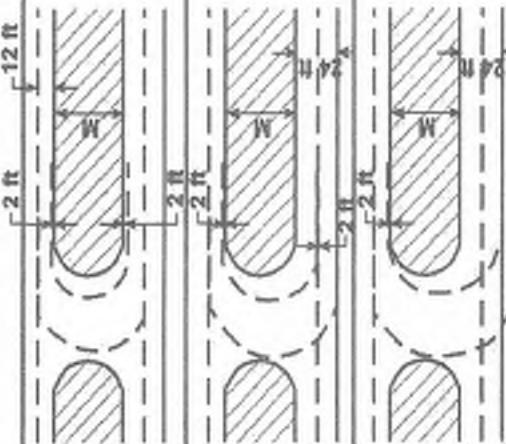

POND

Median U-Turn

TYPE OF MANEUVER	M - MIN. WIDTH OF MEDIAN (ft) FOR DESIGN VEHICLE					
	P	WB-40	SU	BUS	WB-50	WB-60
INNER LANE TO INNER LANE	19	50	30	40	55	65
INNER LANE TO OUTER LANE	30	61	63	71	71	101
INNER LANE TO SHOULDER	18	49	51	51	59	69

The diagram illustrates three types of median U-turn maneuvers. 1) 'INNER LANE TO INNER LANE': A car turns from the inner lane into the median, which is 2 ft wide, and then continues straight into the opposite direction. 2) 'INNER LANE TO OUTER LANE': A car turns from the inner lane into the outer lane, which is 2 ft wide, and then continues straight into the opposite direction. 3) 'INNER LANE TO SHOULDER': A car turns from the inner lane into a shoulder, which is 2 ft wide, and then continues straight into the opposite direction.

SR 74 COMPREHENSIVE CORRIDOR STUDY

SR 74 Community Meetings #3 and #4
July 12 & 19, 2017

Location (Meeting #3)

Peachtree City Library
151 Willowbend Road
Peachtree City, GA 30269
5:00 pm – 7:30 pm

Location (Meeting #4)

Fairburn City Hall
56 SW Malone Street
Fairburn, GA 30213
5:00-7:00 PM

Summary

The final round of community meetings for the SR 74 Corridor Study were held in July 2017. The third meeting was held on **Thursday, July 12th, 2018** at Peachtree City Hall from 5:00 pm -7:30 pm. The fourth meeting was held on **Thursday, July 19th, 2018** from 5:00 pm to 7:00 pm at the Fairburn City Hall. The first meeting was hosted in conjunction with the ongoing Fayette CTP project team, while the fourth meeting was focused only on the SR 74 Corridor Study. Hosted by members of the consultant team (Pond and Sycamore), the main purpose of the meetings was to present the emerging alternatives and concepts for intersections along the corridor. Meeting materials are available in **Attachment A**, and photos from the meeting are in **Attachment B**.

Open House

In lieu of a formal presentation, both meetings were held in an “open-house” – style format, where attendees were free to visit several stations of boards presenting various information as indicated below:

- The first station was comprised of general information regarding the corridor study, including a project description and timeline.
- The second station included information collected as part of the study’s community engagement process – particularly results from the community survey and vision corridor vision developed from both the public and stakeholder committee.
- The third station included information on GDOT’s intersection control evaluation (ICE) tool, which was used to assess the potential corridor improvements and arrive at the preferred alternative – the superstreet - which was presented.
- The fourth station provided information on the components of superstreets: Restricted Crossing U-Turns (RCUTS), J-Turns, and Median U-Turns.
- The fifth station presented the suggested vehicular and bicycle/pedestrian improvements, specifically what types of improvements are recommended at intersections along the corridor. The improvements include those associated with superstreets, traffic signal adjustments, access management, and bicycle/pedestrian improvements.

In addition to the information pertinent to the SR 74 Corridor Study, a preliminary design of the proposed GDOT interchange improvement at I-85 and SR 74 in Fairburn was also available for attendees to view.

STATION: background

SR 74
COMPREHENSIVE CORRIDOR STUDY

schedule & process

study purpose

The Fayette County Department of Public Works is embarking upon a comprehensive corridor study of State Route (SR) 74 from US Route 29 on the north end to SR 54 in Peachtree City. Serving as a primary commuting corridor in Fayette County, SR 74 carries over 36,600 vehicles per day. It is a heavily used corridor that traverses Fairburn, Tyrone, Peachtree City, and unincorporated Fayette County. SR 74 has been identified by previous planning efforts and studies as a corridor that is ripe for change. This Comprehensive Corridor Study will examine a 12 mile stretch of SR 74 from US Route 29 to SR 54 in Peachtree City. The study will establish a corridor vision that is supported by stakeholders and will set forth a plan for bringing the vision to reality.

2010 population & employment

anticipated 2040 population & employment

The corridor is anticipated to continue to attract population and employment growth. In the images to the left, which compare 2010 population and employment with anticipated year 2040 conditions, the areas of blue represent population, with the intensity of the color indicating the relative amount of population anticipated in those areas. Likewise, the orange dots represent employment, with the size of each dot indicating the relative amount of employment in each location.

corridor vision

Policy

Access Management

Implement corridor-wide access management policies to help maintain mobility

Implement access management practices such as frontage/backage/access roads and inter-parcel access to limit curb cuts on SR 74 while maintaining accessibility for residents and businesses

Accessibility/Connectivity

Maintain or enhance accessibility/connectivity for residents and businesses without negatively affecting mobility

Identify new corridors and access points to I-85 to improve accessibility and mobility. Possible new I-85 interchange at SR 92/Gullatt/Johnson Road

Improve pedestrian and bicycle access to corridor destinations and amenities (retail, downtowns, parks, libraries, etc.)

Maintain and Improve Aesthetics

Implement corridor-wide design guidelines for private development and transportation investments to ensure a cohesive and aesthetically pleasing corridor

Develop and implement consistent signage standards throughout corridor

Identify and install decorative treatments throughout corridor to highlight SR 74 as a 'Gateway Corridor'

Seek Opportunities to Encourage and Facilitate Alternative Travel Modes

Identify and implement transportation projects that encourage alternative modes of travel including pedestrian, bicycle, and transit

Identify potential funding opportunities to fund shuttles, park and ride lots, van pools, and ride sharing

Land Use/Development Patterns

Identify and adopt zoning and development standards that balance growth with roadway network capacities in order to maintain mobility

Encourage development patterns that help reduce automobile trips (mixed-use, transit-oriented, etc.)

Accommodate anticipated economic development without jeopardizing corridor mobility

Mobility

Identify and implement transportation improvements that preserve or enhance traffic operations and travel times along the SR 74 corridor

Implement operational and capacity improvements to accommodate planned growth within the corridor

Implement 'Smart Corridor' technologies such as adaptive signal control, queue detection, intelligent transportation systems (ITS) to improve traffic operations and safety within the SR 74 corridor

STATION: community input

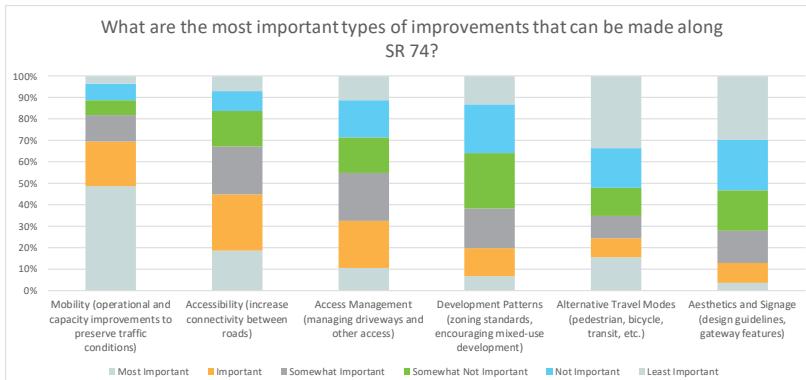

SR 74

COMPREHENSIVE CORRIDOR STUDY

STATION: corridor plan

SR 74 COMPREHENSIVE CORRIDOR STUDY

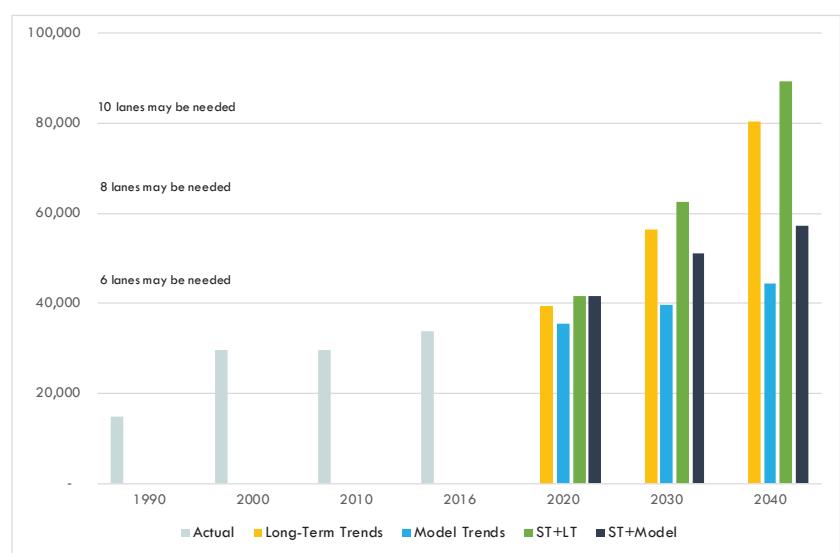

GDOT Intersection Control Evaluation (ICE) Tool

- Team utilizing GDOT Intersection Control Evaluation (ICE) tool to evaluate proper control, safety and innovative intersection concepts for corridor
 - Corridor wide: Superstreet using RCUT/J-Turn/Median U-Turn intersections emerge as best corridor wide option

Corridor Growth

- **Long-Term Trends:** 4.28% per year growth applied consistently
 - **Model Trends:** 1.20% per year growth applied consistently
 - **Short-Term + Long-Term:** 5.90% per year growth applied for 6 years, followed by 4.28% per year applied afterwards
 - **Short-Term + Model:** 5.90% per year growth applied for 6 years, followed by 1.20% per year applied afterwards

STATION: superstreet concept

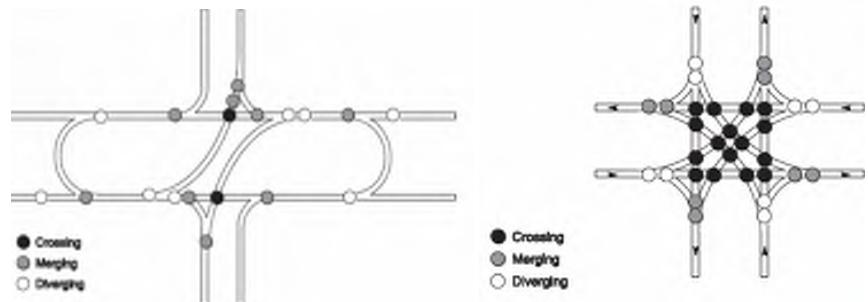

SR 74
COMPREHENSIVE CORRIDOR STUDY

RCUTS

- U-turns in wide median serve major street lefts, minor street thru/left movements
- Independent signals in each direction on major street allows perfect progression
- Two-phase signal means more major street thru/left green time Similar to widely used mid-block “leftover” concept
- Greater minor street thru/lefts travel time using median U-turns
- Similar to widely used mid-block “leftover” concept

Example of RCUT configuration

Reduced intersection conflict points (from 32 to 14)

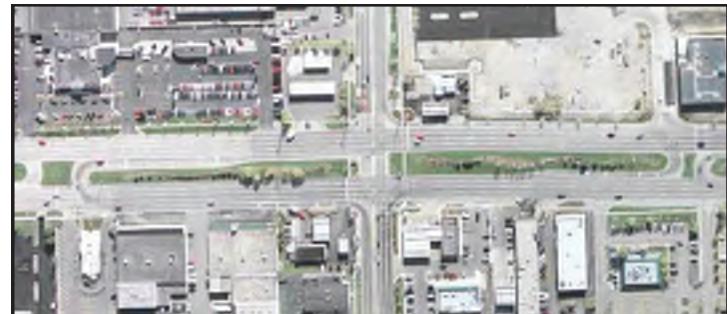

NC 187 at Peanut Plant Road Elizabethtown, NC	Total Crashes	Injury Crashes	Front Impact Inj Crashes	Fatalities
3 Years Before Project (3/03-3/06)	24 (8.0/yr)	21 (7.0/yr)	19 (6.3/yr)	1 (0.33/yr)
1.5 Years After Project (9/06-2/08)	2 (1.3/yr)	0 (0/yr)	0 (0/yr)	0 (0/yr)

J-Turns (unsignalized)

- Similar to RCUTs but without signals
- J-turns are excellent safety countermeasure for unsignalized intersections

Median U-Turn (MUT)

- Left-turns via one-way U-turn crossovers in wide median
- Major and Minor ST vehicles “turn right to go left”
- 2-phase signals at all Main and U-turn intersections
- Main and crossover signals coordinated
- Great corridor access management; widely used in MI

Example of Median U-Turn Intersection

SR 74
COMPREHENSIVE CORRIDOR STUDY

Vehicular Improvements

- Restricted Crossing U-Turn (RCUT) (signalized) Intersection Projects
 - J-Turn (unsignalized) Intersection Projects
 - Median U-Turn (signalized) Intersection Projects
 - New Sidestreet Traffic Pattern
 - New Traffic Signal
 - Existing Traffic Signal (may need modifications to accomodate new traffic pattern)
 - Access Management Area Improvements/Regulations
 - Interparcel Connections
 - New Roadway
 - Other improvements being made as part of regional transportation improvements

Bicycle and Pedestrian Improvements

-  Bicycle Routes (specific improvement type to be determined)
 -  Multi-Use Paths
 -  Pedestrian Crossing Facilities
 -  Grade-Separated Crossing

Lester Thompson, City of Fairburn
Phillip Troquet, Town of Tyrone

Summary

The fourth stakeholder committee meeting of the SR 74 Comprehensive Corridor Study was held on **Thursday, September 20^{sr}, 2018** at the Tyrone Public Library from 1:00 pm -2:30 pm. Facilitated by members of the consultant team (Pond and Sycamore), the meeting included a formal presentation by project manager Eric Lusher, as well as an open-house where updated recommendations for the corridor were shown. A sign-in from the meeting is provided in **Attachment A**, and materials from the meeting are included in **Attachment B**.

Presentation

The meeting began with a formal presentation by Pond Project Manager, Eric Lusher, to the stakeholder committee. The presentation included a brief status update of the SR 74 Corridor Study. This overview included information on initial findings from the technical analyses and community outreach.

The second part of the presentation included information on the various vehicular, bicycle and pedestrian recommendations for the corridor. While much of the information presented was shown

during the last stakeholder meeting and open houses, several new recommendations were added. Several of these recommendations relate to projects identified in previous studies.

In addition to the updated corridor recommendations, Eric also presented a 'Framework for Corridor Consistency', which included suggestions for development guidelines related to Greenfield Development and New Development for six categories (Access Management, Block Area and Length, Front Setback/Greenspace, Parking, Sidewalk Standards, and Signage).

Next Steps

With these finalized recommendations, the project team will work on finalizing a draft report to distribute to the stakeholder committee and other entities by mid-October.

Framework for Consistency

SR 74
COMPREHENSIVE CORRIDOR STUDY

Identified Category	Greenfield Development	Redevelopment
Access Management	Reduce/require interparcel connectivity. Require shared access driveways with uniform signage. Secondary roadway network (i.e. backage raods) should enhance access	Discourage construction of additional driveays if there is access to the roadway network via an existing driveway on parcel. Encourage closing of redundant driveway access.
Block Area and Length		Suggested minimum block length of 600 feet.
Front Setback/ Greenspace	Require undisturbed tree buffer area. 30 feet for nonresidential development and 50 feet for residential development - along SR 74. Buffer/setback area can include multi-use trail	Retain undisturbed/tree buffer area as close to new development standards as permissible. In lieu of/addition to tree uffer, allow for minimum landscaped buffer of 15 feet with berm/screen. Buffer/setback area can include multi-use trail
Parking	Encourage placement of minimum of 50% of parking on side of rear of new developments	New parking in excess of 50% of total is encouraged to be placed to the side of rear of developments
Sidewalk Standards		Require placement of 5 foot wide sidewalk on west side of corridor and connecting roads and 10 foot wide trail on east side. Include minimum 2 foot grass strip/other buffer between sidewalk/trail and roadway. In areas where sidewalk can connect to multi-use trail, provide wider sidewalk to accommodate bicyclists and pedestrians (~10 feet)
Signage		Require use of ground signs with consistent and uniform aesthetic among municipalities to promote uniform placemaking and business promotion along the corridor.

Promote the New Park and Ride Lot and Carpooling Options

Peachtree City, Tyrone, Fairburn, Fayette County, and the South Fulton CID should coordinate and collaborate through the SR 74 Coalition to promote the park and ride on SR 74. Initially, this includes promoting the upcoming grand opening in official communications such as social media, newsletters, and websites. This promotion should include encouragement for carpools to register through Georgia Commute Options for rewards, guaranteed rides home, and other programming.

Implement Workplace Commute Options

Working through the SR 74 Coalition, Peachtree City, Tyrone, Fairburn, Fayette County, and the South Fulton CID should promote and encourage workplace commute options through coordination with the Georgia Commute Options program to assist area employers with creating programs and policies. Benefits are broad and include such factors as reductions in vehicular traffic demand and better employee retention and job satisfaction. Consideration for these programs and policies include potential collaboration and incentive packages with Transportation Network Companies (TNC) such as Lyft and Uber, promotion of walking and biking (that should be coordinated with physical investments in active transportation mode infrastructure), and broad promotion of previously cited initiatives such as carpools, vanpools, and the promotion of the Park and Ride Lot.

Promote and Incentivize the Use of Vanpool Services

Working through the SR 74 Coalition, Peachtree City, Tyrone, Fairburn, Fayette County, and the South Fulton CID should promote and encourage vanpool formation. This includes promotion through official communication channels and consideration of subsidy assistance for private vanpool service to include incentive offers for interested participants, such as "one month free/try it" and/or applicable reimbursements.

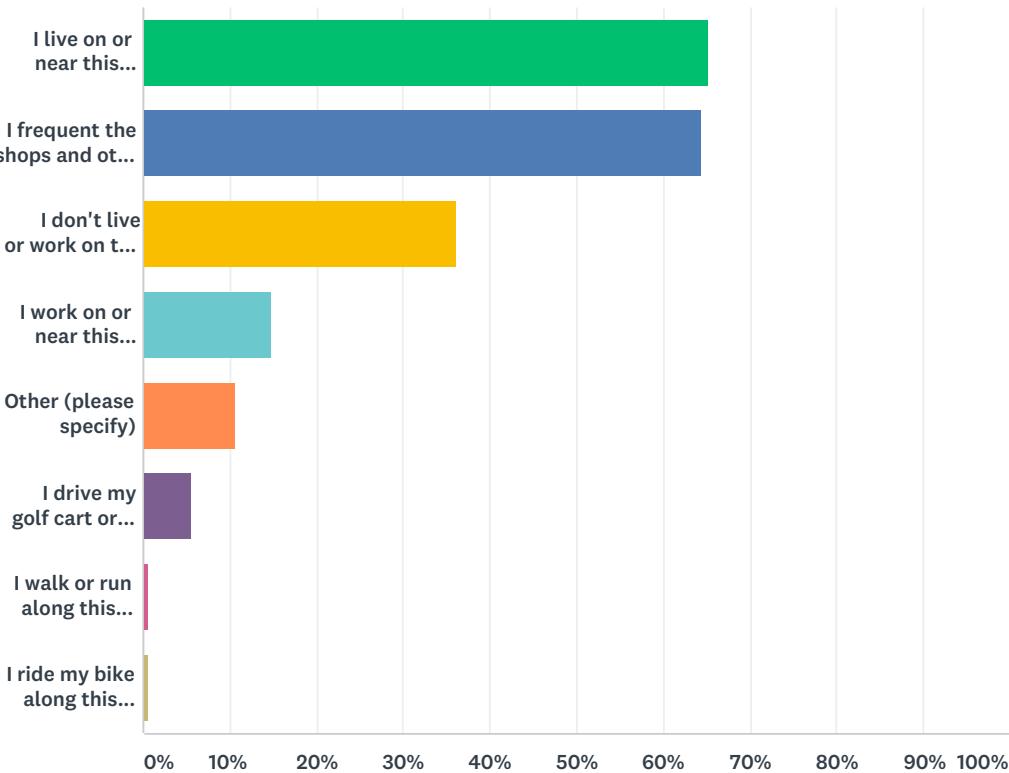

Connect MARTA to the New Park and Ride Lot

Extend and modify MARTA routes as identified in the South Fulton CID Multi Modal Plan:

- CID-20 which extends MARTA Route 181 to SR 74 including a turnaround at the park and ride lot.
- CID-21A which extends MARTA Route 89 to SR 74 including a turnaround at the park and ride lot.
- CID-21B which modifies Route 889 to use Oakley Industrial Boulevard instead of Oakley Road and includes a turnaround at the park and ride lot.

Q1 How do you use this segment of SR 74? Please check all that apply.

Answered: 141 Skipped: 0

ANSWER CHOICES		RESPONSES	
I live on or near this segment of SR 74		65.25%	92
I frequent the shops and other businesses on this segment of SR 74		64.54%	91
I don't live or work on this segment of SR 74, but I use it to commute to my job and/or school		36.17%	51
I work on or near this segment of SR 74		14.89%	21
Other (please specify)		10.64%	15
I drive my golf cart or other Personal Transportation Vehicle (PTV) along SR 74 (other than an automobile)		5.67%	8
I walk or run along this segment of SR 74		0.71%	1
I ride my bike along this segment of SR 74		0.71%	1
Total Respondents: 141			

#	OTHER (PLEASE SPECIFY)	DATE
1	I commute to College Park, GA daily using SR 74.	11/1/2017 9:37 PM
2	I commute to my office on this segment.	11/1/2017 7:05 AM
3	We use this segment to get to I85	10/31/2017 11:32 AM

Q4 What is the best aspect of this segment of SR 74 today?

Answered: 124 Skipped: 17

#	RESPONSES	DATE
1	It is a straight shot to Peachtree City and 85 but you need more lanes and access routes to 85.	11/7/2017 2:58 PM
2	Convenience	11/3/2017 2:00 PM
3	Access to large volume of commercial businesses/enterprises	11/3/2017 12:49 PM
4	Multiple Lanes and Coordinated Lights during commute time.	11/1/2017 11:11 PM
5	Nothing. The unrestricted growth of businesses in South Fulton County with no increase in SR 74 lanes has made driving this section a nightmare.	11/1/2017 9:37 PM
6	Between Tyrone and Peachtree Pkwy.	11/1/2017 9:28 PM
7	It leads to I-85.	11/1/2017 8:00 PM
8	Access of i85	11/1/2017 6:49 PM
9	love the rural drive feeling as you enter tyrone and points south	11/1/2017 6:30 PM
10	Scenic areas make the ride enjoyable...Tyrone bridge and intersection, Tyrone road and SR74... still not congested... Peachtree City 74/54 is already a nightmare between 2:30pm-6:00pm	11/1/2017 6:02 PM
11	The convenient access to 85.	11/1/2017 7:05 AM
12	It's beauty in parts. The wide median.	11/1/2017 7:00 AM
13	The area between 54 and 85 is nice.	10/31/2017 8:59 PM
14	Nothing. Over built, slow traffic, non-sequential traffic signals.	10/31/2017 8:41 PM
15	I can still be navigated occasionally, but not often, to the expressway.	10/31/2017 8:25 PM
16	Nothing. This highway has become too dangerous. Especially the exit on 85 southbound.	10/31/2017 6:02 PM
17	I was the lack of red lights, but that has changed near 74/85 interchange.	10/31/2017 5:22 PM
18	None	10/31/2017 5:05 PM
19	Traffic flows smoothly except for the 54 intersection	10/31/2017 4:15 PM
20	sidewalks	10/31/2017 4:04 PM
21	Good traffic flow, with the exception of 74/54.	10/31/2017 3:37 PM
22	nothing	10/31/2017 2:27 PM
23	4 years ago, it was sufficient.	10/31/2017 11:59 AM
24	4 lanes	10/31/2017 11:32 AM
25	It's not a single lane	10/31/2017 11:25 AM
26	None - not since the DOT widened it years ago. Used to be pretty and tree lined. Now just another ugly north/south highway.	10/31/2017 11:19 AM
27	Other than the i85 exit and entrance traffic it flows well and there is good access to shops and stores in both direction. For example long turn lane to Starbucks and Taco Bell area	10/31/2017 10:57 AM
28	The best aspect is the short distance to the interstate from PTC. Although the nightmare starts with the congestion with numerous restaurants and trucking outlets at Hwy 74 & I-85 interchange. The constant damage to the asphalt is also a nightmare.	10/31/2017 10:33 AM
29	Not too many traffic lights.	10/31/2017 10:07 AM
30	NOTHING	10/31/2017 9:27 AM
31	Still somewhat limited access.	10/31/2017 7:27 AM

SR 74 Comprehensive Corridor Study Online Survey

32	It's the best way to get to Interstate 85.	10/31/2017 7:27 AM
33	There is nothing good about it. Even the distances between stop lights have too few lanes to make traffic flow easily and comfortably. 74 is very bad in all aspects.	10/31/2017 6:46 AM
34	The farms and natural areas, not overbuilt	10/31/2017 5:54 AM
35	smooth road until one reaches the Fulton County line	10/30/2017 8:52 PM
36	smooth road until one reaches Fulton County line	10/30/2017 8:36 PM
37	4 lanes	10/30/2017 8:33 PM
38	The Fayetteville county line! Don't zone more businesses or housing on 74. Require green space.	10/30/2017 8:31 PM
39	None	10/30/2017 7:58 PM
40	Smooth pavement	10/30/2017 7:58 PM
41	It is 4 lane	10/30/2017 6:54 PM
42	Traffic flow due to good visibility except at Tyrone RR overpass light southbound and relatively few traffic signals south of Milam Road.	10/30/2017 5:12 PM
43	In Peachtree City	10/30/2017 3:53 PM
44	55mph speed limit	10/30/2017 3:30 PM
45	Only way out of town to I-85	10/30/2017 3:24 PM
46	The higher speed limit and new businesses	10/30/2017 12:41 PM
47	Long and empty with few breaks/stops.	10/30/2017 11:26 AM
48	uhhh...not much other than the fact that it is a 4-lane divided hwy. It is usually kept clean...that's about it.	10/30/2017 8:07 AM
49	Direct path to PTC.	10/30/2017 5:40 AM
50	Speed limit 55. Use of turning lanes.	10/29/2017 9:33 AM
51	No potholes	10/29/2017 8:37 AM
52	Easy, straight drive with no more traffic lights than necessary	10/29/2017 7:22 AM
53	The fact that you can get on the interstate	10/28/2017 9:42 PM
54	Businesses	10/28/2017 8:03 PM
55	Long stretches with no traffic lights and nice wooded areas.	10/28/2017 7:58 PM
56	There are not a lot of strip malls. It still looks like the country.	10/28/2017 7:21 PM
57	Nothing	10/28/2017 6:06 PM
58	There really is none - for me it is mostly a pass thru to Fairburn or I-85. However, I have used the cheap gas stations and liquor store on occasion.	10/28/2017 12:38 PM
59	It flows well from Wisdom Road north to Tyrone	10/28/2017 10:58 AM
60	Well maintained up to I85. North of freeway needs work	10/28/2017 5:31 AM
61	4 lanes	10/27/2017 10:41 PM
62	Being Four lanes b	10/27/2017 10:19 PM
63	Easy to get to businesses on 74.	10/27/2017 9:22 PM
64	4 lane with turn lanes	10/27/2017 9:00 PM
65	It's generally not very crowded unless you are at 74/85 or 74/54. The lights also seem to be timed well.	10/27/2017 8:20 PM
66	Visibility except curve heading North near Sandy Creek and over bridge heading South after Tyrone Publix.	10/27/2017 6:25 PM
67	No pot holes. Enough lanes for side traffic to exit. Extra turn lane for Oakley is maxes out.	10/27/2017 5:41 PM
68	Nothing anymore! It used to be a great road, now traffic has made it awful.	10/27/2017 5:02 PM

SR 74 Comprehensive Corridor Study Online Survey

69	The acreages of land that is available for 5-star restaurants, townhouses and hi-tech businesses.	10/27/2017 4:07 PM
70	There's nothing good about it, but the least congestion is from Peachtree parkway to Aberdeen parkway.	10/27/2017 4:01 PM
71	Convenient access to most of PTC	10/27/2017 3:49 PM
72	Generally you can move down 74 fast and can get to Tyrone quickly	10/27/2017 3:32 PM
73	Convenient	10/27/2017 2:12 PM
74	There's not too much traffic most of the time (other than rush hours)	10/27/2017 1:56 PM
75	north Fayette and south Fulton County- between Peachtree Parkway and Milam Road	10/27/2017 1:51 PM
76	Has access to 85	10/27/2017 1:40 PM
77	There really aren't any good points to this intersection. It is terribly congested during rush hours, the lights don't appear to be timed properly and the back up from the exit onto 85 (heading southbound) during the afternoon rush is getting progressively worse.	10/27/2017 1:21 PM
78	Connects to I85, still some stretches of green instead of retail all the way.	10/27/2017 1:13 PM
79	NOTHING!!!!	10/27/2017 12:42 PM
80	The natural corridor in Tyrone. They have successfully avoided the Riverdaleization of 74 where Riverdale ruined GA 85.	10/27/2017 12:23 PM
81	Vegetation buffer between buildings and roads, minus the fast food establishments close to 85	10/27/2017 12:19 PM
82	55mph and 2 lanes. target plaza shopping.	10/27/2017 12:05 PM
83	N/a gotten too busy, lights are not timed well, entrance to 85 causes delays	10/27/2017 12:05 PM
84	Limited traffic lights south of Fairburn to Tyrone allowing nearly uninterrupted travel.	10/27/2017 10:32 AM
85	Ample shopping and dining opportunities.	10/27/2017 8:46 AM
86	Relatively few traffic signals and well-maintained medians and shoulders along the Fayette County section.	10/27/2017 6:58 AM
87	Peachtree City segment and undeveloped segment between Tyrone and Fairburn. Best because of limited or controlled access and little development.	10/27/2017 6:26 AM
88	Pretty land in some areas Smooth traffic flow north of 54	10/27/2017 5:36 AM
89	For the moment traffic on this segment of SR 74 is only terrible near exit 61 trying to get onto I-85 and near the intersection of 54 and 74. Other than that traffic is not that bad on this segment of SR 74.	10/27/2017 5:20 AM
90	Access to hospital/medical facilities, shops, movie theaters & restaurants in Peachtree City and Fayetteville without driving the Interstate.	10/26/2017 10:39 PM
91	the rate of speed - not too slow	10/26/2017 9:16 PM
92	is straight route for me to go i-85N	10/26/2017 8:44 PM
93	There is a lot of land for future development.	10/26/2017 7:31 PM
94	The location and access to good shopping	10/26/2017 11:58 AM
95	It's getting worse. Clogged with industrial trucks and semi-vehicles and poor traffic flow and bad light timing.	10/26/2017 11:28 AM
96	The landscaping in Peachtree City	10/26/2017 11:07 AM
97	Nothing	10/25/2017 3:18 PM
98	Except for Fulton County, the stretch is pretty. Fulton County no planning on "sights."	10/25/2017 2:35 PM
99	It gets you places.	10/24/2017 6:32 PM
100	Nothing. The county approved the big studios, gave them tax incentives and has done nothing to account for all the extra traffic that has accumulated to man the studios. Then they tell us we have to tax ourselves with a splost to fix thier problem.	10/24/2017 12:04 PM
101	four lanes	10/24/2017 9:38 AM

SR 74 Comprehensive Corridor Study Online Survey

102	in Fayette, the best aspect is drivers do not enter businesses from the highway (unlike the northern part of the corridor).	10/24/2017 7:14 AM
103	I like that the median has greenery so it feels less like a freeway still road. I like there's a grass divide, but some areas could use more trees	10/23/2017 9:01 PM
104	Not as congested	10/23/2017 8:41 PM
105	It's smooth	10/23/2017 8:16 PM
106	Tyrone so far has limited access directly onto 74 and traffic flow is much smoother there.	10/23/2017 8:11 PM
107	In Peachtree city traffic ok. Heading west from expressway traffic is bad	10/23/2017 7:29 PM
108	Most of it is clean and efficient. It is not so wonderful when you go from north of Tyrone up through the 74/85 intersection.	10/23/2017 5:31 PM
109	Crabapple to Kirkley rd	10/23/2017 5:21 PM
110	Reasonable speed limit and 2 lanes in each direction also traffic lights seem to work well on timers and don't always catch each red light	10/23/2017 4:59 PM
111	Businesses along this segment have opened up.	10/23/2017 3:27 PM
112	Fast / few lights	10/23/2017 2:14 PM
113	The unbuilt up areas it runs through.	10/23/2017 1:00 PM
114	Plenty of restaurants and businesses to frequent	10/23/2017 12:09 PM
115	new payment in the fayette county section of the roadway	10/23/2017 11:53 AM
116	Few traffic lights-divided highway with grasses median and beautiful trees lining a good portion of the sides of the roadway. Most businesses except in ugly Fairburn area are set back from the road. Note: the area at Milam Rd intersection is NOT what we want to see. No ugly movie studio buildings , either, as is the view at Pinewood Studio.	10/23/2017 11:27 AM
117	Direct access to Interstate 85	10/23/2017 11:20 AM
118	as of now none	10/23/2017 11:16 AM
119	Recently repaved, so it is a smooth ride	10/23/2017 10:45 AM
120	Quality of the road is very good (no potholes, bad spots, etc).	10/23/2017 10:44 AM
121	Minimal direct commercial/retail business access has maintained this thoroughfare's good traffic flow	10/23/2017 10:38 AM
122	Much of the area between Fairburn and Peachtree City is open, 55-speed limit highway that moves efficiently	10/23/2017 10:29 AM
123	congested/crowded	10/20/2017 8:06 AM
124	Ease of interstate access	10/7/2017 1:42 PM

Q5 If you could make one change to a portion of SR 74, what would it be and where? Please be as specific as possible.

Answered: 137 Skipped: 4

#	RESPONSES	DATE
1	The lights need to be synchronize. More lanes in and out.	11/7/2017 2:58 PM
2	need a flyover of SR 54 to avoid traffic congestion at the 74/54 intersection	11/5/2017 10:38 AM
3	More lanes on off ramp from 85s onto 74. Something also needs to be done about the intersection of 54 and 74, more turning lanes, possibly fly away lanes or exit ramps instead of lights??	11/3/2017 2:00 PM
4	Alleviate congestion on 54 / 74 intersection with a possible flyover. Find a way to move traffic on 54 SB Faster to avoid intersection blocks.	11/1/2017 11:11 PM
5	Close the entrances to SR 74 from the McDonalds, Chick-fil-a, Dunkin Donuts, and Waffle House.	11/1/2017 9:37 PM
6	From QT to the entrance ramp of Hwy 85 North or South.	11/1/2017 9:28 PM
7	Improve the 74/I-85 interchange	11/1/2017 8:00 PM
8	Ramp for large trucks at hwy 92. Too many large trucks exit I85 south and then have to get over in left lane to turn left on Oakley Road . Very dangerous!! Another option is to add exit ramp lane to I85 south.	11/1/2017 6:49 PM
9	I85 interchange bridge make it wider and additional lane	11/1/2017 6:30 PM
10	Interstate 85 /SR 74 is a nightmare!!... Let's begin with the onramp 85N (Waffle House)... One lane to get on the interstate... And the offramp 85S is worse... Drivers are nervy enough to cross the "gor" after the SR92 bridge instead of waiting their turn...Fulton County Police could make a fortune if placed a cop there to hand out tickets between 3:30pm-5:30pm... The bridge is a bumpy mess, especially for low profile tires... There is no enough room on the bridge to run the traffic through smoothly if cars are also waiting to enter 85N on the bridge... The whole idea of a truck exit has made someone rich but, is a commuter nightmare!! Use eminent domain to buy out Waffle House and make an extra on ramp... or a separate trucker ramp... or look at alternate clover leaf options... PLEASE	11/1/2017 6:02 PM
11	I'm not sure any change would help the volume of traffic at 74/54 intersection.	11/1/2017 7:05 AM
12	Continued improvements at the I-85 interchange. Create lanes that allow traffic to keep moving in the left lanes but allow traffic to enter the highway in the right lanes. More intersection like the one at Sandy Creek that improves safety.	11/1/2017 7:00 AM
13	Portion between Sandy Creek Road and I-85 and closer to interstate entrance. It's too congested to get on I-85. What should be a 20 minute commute to work can take an hour just trying to get onto I-85. Additionally, to get off I-85 at Exit 61 is extremely dangerous and backs up onto the interstate. It's an accident waiting to happen area. Something needs to change there also!!	11/1/2017 6:21 AM
14	Build a flyover bridge at 54/74 so Newnan traffic does not have to get caught in traffic there.	10/31/2017 8:59 PM
15	Take out half of the traffic signals, get rid of islands and pave for turn lanes.	10/31/2017 8:41 PM
16	Freeze building projects until traffic congestion is relieved. Not planned, actually built.	10/31/2017 8:25 PM
17	Exit from I-85 southbound is a major hazard. Vehicles always back up onto the interstate. Mainly due to semi traffic entering and exiting I-85. Commuting to Peachtree City traffic is fast and heavy. Widening of 74 and possible other exits from I-85 are desperately needed	10/31/2017 6:02 PM
18	Thru traffic lanes near 74/85 interchange	10/31/2017 5:22 PM
19	The lights need to be set to be the most efficient at 0645. Not have long cross street greens, etc. Create a new 85nb exit off 74	10/31/2017 5:05 PM
20	The intersection of 54 needs to flow better the transition from S 74 onto W 54 is poorly designed and backs up as well as poorly timed signals on 54 W past the Avenue and the TJ Max signal	10/31/2017 4:15 PM

SR 74 Comprehensive Corridor Study Online Survey

21	There needs to be a bypass from 74 in Peachtree City going to Hwy 34 in Coweta. Ideally from somewhere around the Ball Fields(Athletic Complex) and coming out somewhere several miles away from Fischer Rd.	10/31/2017 4:04 PM
22	Fix the SR74/54 intersection. Design a non-stop route for thru traffic on both 54 & 74.	10/31/2017 3:37 PM
23	dedicated lanes where you can't change lanes at the last minute once you pass Bojangles (getting onto I-85)	10/31/2017 2:27 PM
24	n/a	10/31/2017 11:59 AM
25	Add an additional lane	10/31/2017 11:25 AM
26	Bring back the trees, especially in the center medians. And add alternative roads, both north/south and east/west, to ease congestion on 74. That's really the only solution at this point.	10/31/2017 11:19 AM
27	Entrance to i 85 North and exit from i85 south Those just don't work with the short bridge and traffic light set up. Need another entrance exit/entrance south of senoia road. This might handle some truck traffic as well	10/31/2017 10:57 AM
28	Change flow of traffic near Interstate 85-- the number of lights and resulting congestion are concerning	10/31/2017 10:57 AM
29	Install additional exit/entrance ramps to/from I-85 at Hwy 92 for Oakley Industrial Blvd and install another exit/entrance ramp for Hwy 29 Fairburn. This collective area has residential traffic, business traffic and combined with industrial traffic makes it a nightmare. Widen the existing Hwy 74 and repair all potholes. Unless there are additional exits/entrances to the interstate installed, the problem will only grow.	10/31/2017 10:33 AM
30	The intersection at SR 74 & SR 54. SR 54 should be raised at the intersection, and traffic managed better along SR 54 directly to the West of SR 74 - coordinated lights, etc.	10/31/2017 10:07 AM
31	A different route for 18-wheelers to get them out of this area. Trying to get on/off the exit is a congested disaster at most times of the day (not just rush hours/commute times). This has become a major truck stop exit and it has caused so much congestion, accidents. I sit through each stop light at least 3 times. It took me 45 minutes to get off the exit yesterday morning onto I-85 Northbound. THAT IS RIDICULOUS.	10/31/2017 9:27 AM
32	Upgrade 74 I85 intersection. Limit commercial trucks at this intersection.	10/31/2017 7:27 AM
33	The intersection of 74/54 in Peachtree City. It's too congested, so we need to build up as there is no more land available in that area to grow.	10/31/2017 7:27 AM
34	Add more freeway entries to I-85. This intersection is poorly designed, lacks adequate signage, and is poorly maintained.	10/31/2017 6:46 AM
35	Intersection of 74 and I85 is horrendous. It is crowded, dangerous, accident prone and built out with no plan. I avoid this area as much as possible and take Palmetto Road to intersect with I85 as much as possible.	10/31/2017 5:54 AM
36	Marta bus service lot in Tyrone/Fairburn with transfer at College Park Marta transit...service every 10' during peak travel times	10/30/2017 8:52 PM
37	I'm at a lost	10/30/2017 8:36 PM
38	Make it a limited access road with exits and no stop lights. As long as there are stop lights, traffic movement will continue to be a mess!	10/30/2017 8:33 PM
39	Tyrone has more businesses open to 74. Fulton should stop development at 85/74 until roads are useable.	10/30/2017 8:31 PM
40	Timing of lights, makes it stop and go at certain times when it should be the priority to keep traffic moving.	10/30/2017 7:58 PM
41	Improve traffic flow south from around Cracker Barrel to I- 85 intersection. Too many lights and not timed properly	10/30/2017 7:30 PM
42	Eliminate the problem at the SR 74 and I-85 interchange.	10/30/2017 6:54 PM
43	Remove the traffic lights/intersections with Oakley Industrial and Harris Roads or find a different way for the Oakley Industrial traffic to access I-85.	10/30/2017 5:12 PM
44	Where you get on and off of Hwy 85. The whole area is a mess, congested	10/30/2017 3:53 PM

SR 74 Comprehensive Corridor Study Online Survey

45	74/54 intersection congestion	10/30/2017 3:30 PM
46	Interchange with I-85	10/30/2017 3:24 PM
47	Restrict truck stops to ease the congestion of semi trucks on both sides of I-85 entering and leaving the highway	10/30/2017 12:41 PM
48	Red light at Sandy Creek Rd. I hate always going out of my way to turn left there.	10/30/2017 11:26 AM
49	one change isn't enough. 1 - I-85/Hwy-74 entrance & exit ramps: Possibly go to partial clover style to keep traffic moving on I-85 south exit; Also need to keep I-85 North entrance moving. 2 - Hwy 54/74 intersection: Need an overpass or something similar along with no lights/flowing traffic in front of Plantera/Wal-Mart area.	10/30/2017 8:07 AM
50	The interchange at 74 and 85 is congested often causing dangerous backups on 85 for over a mile. This interchange needs a major structural overall or relieved of congestion with an additional exit from 85 into the community. This is imperative in the interest of safety.	10/30/2017 5:40 AM
51	54/74 intersection. Must be an alternate (or 2 or 3) to move west toward Newnan. No way to improve the existing intersection so must add east/west connectors. TDK, Tyrone Rd.. TDK would be a nice extension because the south end of PTC could use some restaurants, shopping, gas stations, Coffee... sorely underserved for the number of people on the south side.	10/29/2017 9:33 AM
52	The approach and interchange to/from 1-85. In the morning it can back up 2-4 miles and at night the exit is incredibly dangerous. The semi traffic is horrible.	10/29/2017 8:37 AM
53	No changes	10/29/2017 7:22 AM
54	need stoplight at 74 and senoia rd	10/29/2017 7:14 AM
55	Restrict trucks to one lane getting off the interstate	10/28/2017 9:42 PM
56	Additional lanes to exit I-85 onto hwy 74.	10/28/2017 8:03 PM
57	No more development from Cracker Barrel toward the interstate. The traffic there is awful.	10/28/2017 7:58 PM
58	I wish the Fairburn portion near I85 would make the area more attractive. Too many gas stations & ugly fast food places.	10/28/2017 7:21 PM
59	Add two lanes from Milam Rd to enter I-85 from Hwy 74	10/28/2017 6:06 PM
60	I would have a grocery store convenient to the subdivisions but NOT near the entrance to 1-85.	10/28/2017 12:38 PM
61	74 intersection at 54 in Peachtree City is not efficient to get around, specifically from Aberdeen Pky down to Paschall Rd. Route 54 from McDuff east to Willowbend Rd helps to create this mess.	10/28/2017 10:58 AM
62	Route truck traffic to 92 to a new exit for 92 on I85 S	10/28/2017 5:31 AM
63	Improve the intersection with I 85. Better on and off ramps. Clear an exit and entrance at GA highway 92 for truck traffic.	10/27/2017 10:41 PM
64	Make certain the traffic signals are all synchronized.	10/27/2017 10:19 PM
65	"Slower traffic stay right" signs. People police the road driving under the speed limit in the left lane all the time.	10/27/2017 9:22 PM
66	I would like to see enhanced landscaping and continuous sidewalks,	10/27/2017 9:00 PM
67	The 74/85 interchange needs improvement. It's dangerous both ways. Southbound off 85, regular commuters have to be wary of tractor trailers who are trying to get over quickly into the truck stops. Northbound to get onto 85 needs more capacity as the area between Oakley and the exit is not enough space for the one lane that feeds it. Three lanes would be nice from the Bojangles all the way to the exit. I've only been commuting this way for 4 years but definitely notice much heavier volume.	10/27/2017 8:20 PM
68	Redesign Sandy Creek with a signalized full cross walk and full size much larger median with both right and left turn capability while creating a traffic hazard signal which flashes while heading North to notify drivers the intersection is either backed up OR heavy activity or light is red.	10/27/2017 6:25 PM
69	Turning from i85 to go away from Peachtree city. Trucks need to use hwy 29 to get to csx, and gullet Rd to relieve exit of trucks.	10/27/2017 5:41 PM

SR 74 Comprehensive Corridor Study Online Survey

70	The truck traffic needs to be rerouted to Oakley Industrial with interstate access at that point. There is also a HUGE problem with cars pulling out of traffic and into the turning lane for the 74 exit heading south so they don't have to wait in the line like the rest of us. Frankly, this commute has become the worst part of my job.	10/27/2017 5:02 PM
71	There's a stretch of SR74 that requires side walk / multi-pathway to enable citizens the ability to walk, jog, and have golf cart usage.	10/27/2017 4:07 PM
72	Relieve congestion at I85	10/27/2017 4:01 PM
73	Improvements to 54/74 intersection	10/27/2017 3:49 PM
74	The on and off ramps where 74 hits I85 are woefully under built for the amount of cars and trucks that are getting on and off. There should be on and off ramps that don't require traffic lights to get on 74.	10/27/2017 3:32 PM
75	Somehow lighten the traffic by the interstate. Dare to dream.	10/27/2017 2:12 PM
76	intersection with I85 - add another right turn lane further back. Also find a way to manage truck traffic better	10/27/2017 1:56 PM
77	Just before and after Oakley Blvd. Too many trucks!	10/27/2017 1:51 PM
78	Put another lane to exit and enter 85. Traffic is terrible everyday trying to get on the interstate and off	10/27/2017 1:40 PM
79	i think it would have to be a cloverleaf of some variety - a very small version of spaghetti junction, so that traffic could continue to flow onto 85N in the morning and flow onto 74 in the afternoon. Also, there needs to be a traffic study to determine the best timing of the lights for specific periods of the day	10/27/2017 1:21 PM
80	Figure out how to alleviate the traffic at 54/74.	10/27/2017 1:18 PM
81	Bridge over GA 54 in Peachtree City.	10/27/2017 1:13 PM
82	I don't want the over building of fast food places and misc. stores, gas stations creeping into peachtree city.	10/27/2017 12:50 PM
83	Needs more than one change so here they are (to me). Too many lights on 74 that are useless at 6am. Make the turn arrows flashing lights,especially at Sandy Creek and Milam Rd, and allow traffic to proceed N/S without a delay. Nothing coming or leaving the quarry at that hour. Too many businesses clumped together in Fairburn and poorly timed lights. Build a separate access road for 85 for the businesses on 74N at the intersection so they have an easy access to the highway. Two lanes that are continual flow to get on 85 North. Make the on ramp to 85 two lanes continuing that on to the highway.... there is plenty of room to do this.	10/27/2017 12:42 PM
84	syncronize the lights in Fairburn remove at least 1 light in Fairburn Make traffic move better in Fairburn	10/27/2017 12:23 PM
85	Easier entrance/exit from I-85, maybe a clover leaf design or something	10/27/2017 12:19 PM
86	Interstate 85 entrance/exit is terrible!!!!	10/27/2017 12:05 PM
87	Entrance (& exit from 85--need to be 2 lane exit or better marked that it's exit only ahead of time) ramp to 85, no turn on red causes people to try to get over. Exiting from chick fil a etc causes back up.	10/27/2017 12:05 PM
88	The off-ramp from the freeway is horrible from 2ish until well after 6 in the evening	10/27/2017 12:02 PM
89	The interchange coming from SR 74 south to I-85 north needs two right turn lanes to the on-ramp where turn on red is allowed in both lanes.	10/27/2017 10:32 AM
90	Open another exit and entrance ramp for all the trucks!	10/27/2017 10:20 AM
91	Interchange of Hwy. 74 and I-85. Traffic is regularly backed up due to high volume.	10/27/2017 8:46 AM
92	Somehow alleviate the horrible traffic congestion that occurs on the Fulton/Fairburn section close to I-85. The truck stops have created a mess and the strip commercial that is being added will only make the situation worse.	10/27/2017 6:58 AM
93	Make the I-85 interchange flow better and stop any further commercial development south of the interchange. Traffic is horrible in that section!	10/27/2017 6:26 AM
94	Better traffic flow at 54	10/27/2017 5:36 AM

SR 74 Comprehensive Corridor Study Online Survey

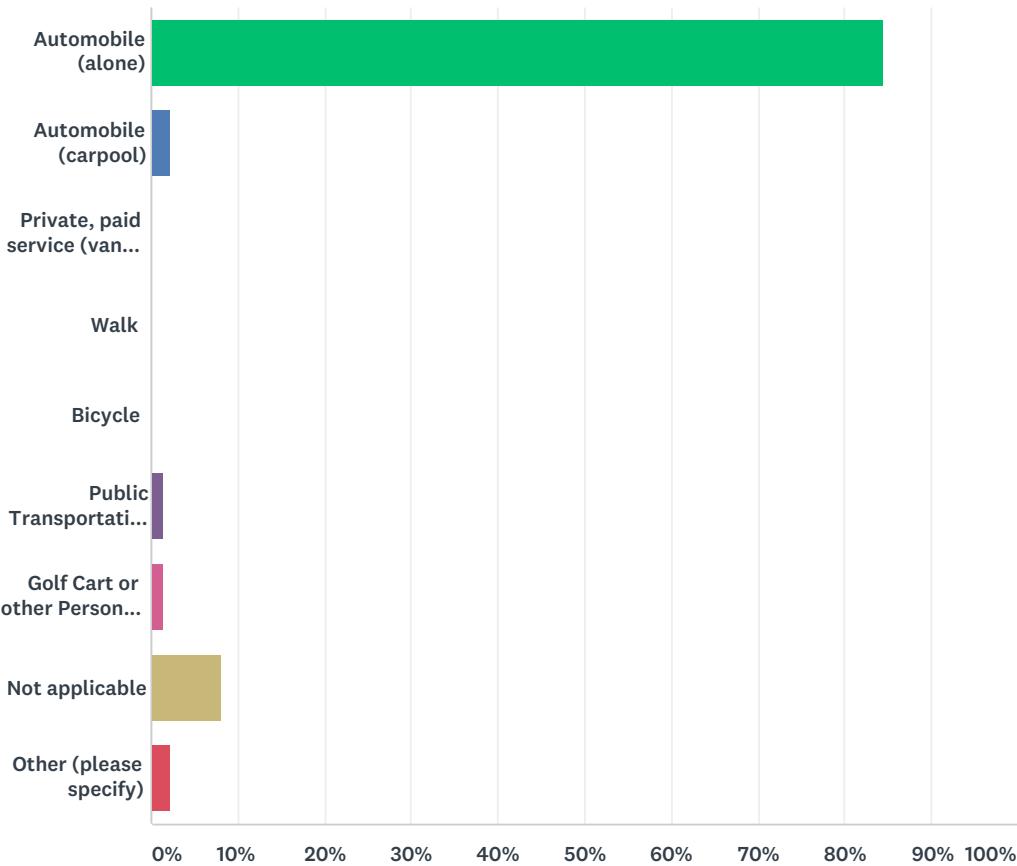

95	I would change the light timing along this entire portion. The lights are not timed properly for morning rush hour.	10/27/2017 5:20 AM
96	Put a YMCA and more upscale dine-in restaurants near the west end of the corridor (near Oakly Industrial Blvd intersection). Note upscale dine-in restaurants versus an abundance of fast food restaurants.	10/26/2017 10:39 PM
97	this road is busy because of its easy access to 85--create another way to get on interstate that is close by so there is a choice. union city exit too far away.	10/26/2017 9:16 PM
98	Traffic lights are not use tripped, most time are timer operated and back up traffic flow, clausing some times not to get thru traffic light. or stopping and going thru timing period in early morning 4/6 am m/f adding more time for commute , some days both problems add 10 min to commute a day, adds up to 50min a week to my commute	10/26/2017 8:44 PM
99	Re-do the bridge to I-85 and make more lanes. Have entrance to I-85 north bound on right so that you don't have to stop at a light. Synchronize lights.	10/26/2017 7:31 PM
100	Bring more businesses closer to Fairburn/Tyrone. Love the businesses along 74	10/26/2017 11:58 AM
101	Intersection of 74 and Milam. Light timing favors heavily for Milam motorists and not those on the busier 74.	10/26/2017 11:28 AM
102	The light to get to turn off the exit to get to 74 takes too long and backs up on the interstate	10/26/2017 11:07 AM
103	The Fayette County portion is fine. The problem is that the City of Fairburn decided to allow runaway development. The ideal (totally unrealistic) solution would some type of bypass that started in Fayette County leading to I-85.	10/25/2017 3:18 PM
104	approach tolnterstate 85	10/25/2017 2:35 PM
105	Having the other counties connect to Interstate 85 and not come t through SR 74.	10/25/2017 2:29 PM
106	Fix traffic at the SR 54 intersection.	10/24/2017 6:32 PM
107	It needs to add multiple lanes, long turning lanes, and find another path for the tractor trailers that slow entry onto the interstate	10/24/2017 12:04 PM
108	I would build an elevated express lane from Milam Rd to I-85N bypassing the lights and semis clogging traffic. Also a lane off I-85S to Milam Rd.	10/24/2017 9:38 AM
109	Two intersections desperately need work - I85 and 74 along with 54 and 74.	10/24/2017 7:14 AM
110	Eliminate trucks at 74 and 85. Better sequence lights at 74 and 54	10/24/2017 6:41 AM
111	Speed is a huge issue and it feels like freeway speeds. The on and off ramps onto 85. It's not marked well (no road strips or easily seen signs). Both areas need some reflective stripes. It's so hard to see at night which lane is which. It's a dangerous intersection and it's not well maintained. The entire ramp style needs to be refigured. Too much traffic coming in and out.	10/23/2017 9:01 PM
112	54/74 intersection needs to be functional and less congested	10/23/2017 8:41 PM
113	Construct a dedicated truck ramp south of 74 on I 85 for access to the intermodal transfer station and warehouses. This would greatly reduce the amount of truck traffic at 74 and I 85.	10/23/2017 8:16 PM
114	Enlarge the 74/I-85 interchange like they did on intersections with I-85 north of 285. Create side access roads that parallel 74 with limited signal intersections. Very limited direct curb cuts from 74 into businesses- for example McDonalds, Chick-fil-a, Dunkin Donuts & Waffle House area is horrific. While those existing business entrances can't be altered - don't allow any more like that!	10/23/2017 8:11 PM
115	More lanes less tractors trailers.	10/23/2017 7:29 PM
116	Move the large trucks off of this intersection. Plan and Build a truck ramp just north on 85 and just south to more easily access the truck areas.	10/23/2017 5:31 PM
117	Interstate intersection —both exit & entrance to interstate 85 are too congested & need another route, possibly add easy access thru Oakley blvd to interstate might alleviate some congestion.	10/23/2017 5:21 PM
118	Improve the hwy 54/74 intersection so that more cars can get through turning from 74 onto 54. Current light only lets about 10 cars through and the light cycle is about 3 minutes. Sometimes during heavy rush hour it takes 3 cycles of the turn lane light to get through the intersection.	10/23/2017 4:59 PM
119	Freeway on/off ramps should be cloverleafed. Approaches widened if possible	10/23/2017 4:43 PM

SR 74 Comprehensive Corridor Study Online Survey

120	Improved traffic flow to I-85 in the am. Perhaps a dedicated branch of the road (SR-74) straight to I-85.	10/23/2017 3:27 PM
121	Need a full cloverleaf intersection at I-85 to eliminate the backups on I-85 south, to speed access to 74 South coming off of I-85, and to speed access to I-85 coming off of 74 north	10/23/2017 2:14 PM
122	Junction of Interstate 85 and Hwy 74 and area just to the south of that. Too many traffic lights and too many large trucks turning into the commercial areas make it slow and dangerous to drive through.	10/23/2017 1:00 PM
123	The section of Hwy 74 beginning with the light at Harper Funeral Home in Fairburn and continuing to the Hwy 74 entrances onto I-85 is extremely congested. There are too many cars to manage with this many lights.	10/23/2017 12:09 PM
124	traffic approaching I85 in the morning rush hour backs up for those getting onto 85. so northbound 74 as you approach 85 in the morning commute	10/23/2017 11:53 AM
125	See above. Also, fix the mess of turning in and out of the area at Westpark and just north of Westpark in PTC. Too dangerous too much traffic.	10/23/2017 11:27 AM
126	Add an additional entrance/exit ramp to/from Interstate 85 between the Union City Exit and Fairburn Exit at Fayetteville Road	10/23/2017 11:20 AM
127	removing a majority of the truck traffic around 74 and I85	10/23/2017 11:16 AM
128	Too many stoplights	10/23/2017 10:45 AM
129	For commuting purposes, bypass the SR74/54 interchange	10/23/2017 10:44 AM
130	Add traffic signal to intersection of SR74 and Old Senoia RD/Lexington Pass. Increased traffic congestion in this area has impact on safety.	10/23/2017 10:38 AM
131	The stretch from the Fulton County line to the I-85 onramps is unbearable, particularly on weekday mornings. The intersections with I-85 and Oakley Industrial need major overhaul!	10/23/2017 10:29 AM
132	add a Interstate Exit/Entrance Ramp in Peachtree City to relieve some of the congestion at Fairburn Hwy 85 exit.	10/20/2017 8:06 AM
133	Top of 74, near 85/Oakley, add lanes, adjust to reduce traffic	10/7/2017 1:42 PM
134	Have a frontage road for the business north of Milam Rd and have dedicated turn lane onto I-85 north starting at Milam Rd.	10/6/2017 7:59 PM
135	light timings to keep 74 flowing at i-85 intersection from milam through onramp	10/6/2017 3:10 PM
136	Improvement of the SR54/SR74 Intersection is desperately needed. Ideally SR 74 would be reconstructed to overpass SR54, allowing for improved traffic flow. There is currently space for the access roads to be built adjacent to the would be overpass if SR74 were to have a bridge built over SR54	10/6/2017 9:03 AM
137	Intersection of SR 54 and SR 74, morning and evening but especially around 5 pm commute time.	10/6/2017 7:36 AM

#	RESPONSES	DATE
1	SR74 should be a flyover of SR 54 to alleviate congestion at the 74/54 intersection	11/5/2017 10:42 AM
2	Based on the poor planning that Fulton County and the State DOT has done with SR 74 in South Fulton County I expect any new work will involve large amounts of corruption and pay-offs. Nothing changes.	11/1/2017 9:40 PM
3	Please do something for the traffic in this area. Hwy 92 should be considered.	11/1/2017 6:53 PM
4	Please limit adding future red lights on 74. Really focus on limited access to 74 from sides	11/1/2017 6:32 PM
5	Let's no dilly-dally on this, and get it done!	11/1/2017 6:07 PM
6	I would really support regional rail from points in Newnan to along 74 to pickup PTC, Tyrone, and Fayetteville residents. Then maybe Fairburn up through there somehow and link up with Marta at the airport. Take the leap and expand rail service!	10/31/2017 9:06 PM
7	Educate people on how to drive the posted speed limit, do not allow yield only lanes to disrupt traffic flow, cease any new development around or that feed this intersection, plan and install new alternate routes around this intersection.	10/31/2017 8:46 PM
8	Stop forming committees and actually do something.	10/31/2017 8:26 PM
9	To maintain property values in Fayette county, something has to be done with regard to the I-85 exit. Semi traffic must be rerouted. Additional roads for entry onto I-85 need to exist. One way in/out is becoming a bottleneck and unsafe. People will stop moving here for that reason alone. Thus leaving Fayette county with nothing but OLD and RETIRED people (no families/children) who realistically have to go north toward Atlanta for work	10/31/2017 6:07 PM
10	Question does not address what's really needed: alternative roads and public transportation options. Why not buck the trend and be the first to build an elevated monorail system between Newnan, PTC and Fayetteville? Think out of the box people!	10/31/2017 11:23 AM
11	The largest issue I see is exiting I 85 from the north. The ramp and light pattern creat a large back up in the actual interstate lane for a good bit. Accidents are frequent and some very severe.	10/31/2017 11:00 AM
12	The I85 exit and entrance has to be addressed. It has become a bottleneck, backing up and blocking multiple lanes of highway, causing multiple accidents. There need to be more ways to enter/exit the highway to get into Fayette County.	10/31/2017 5:58 AM
13	Unless you solve the traffic congestion at the I85 interchange and the number of red lights in that vicinity you wasting time and money! That is the single most problem on SR 74!	10/30/2017 6:59 PM
14	The segment through Peachtree City would benefit if traffic were diverted via well connected roads to bypass the city to Coweta County. Significant reduction of congestion by I-85 would require more direct connections for either truck or automobile traffic to another entrance/exit (I use Palmetto as alternate). Minor improvements would require any additional development between I-85 and Milan Road to use rear exits to feeder roads leading to Milam/Landrum, Harris or Oakley Industrial Blvd to use those traffic lights to enter 74.	10/30/2017 5:18 PM
15	Something as to be done. It is so jammed up in morning and evening	10/30/2017 3:56 PM
16	The traffic lights need to be timed to allow continuous flow on 74	10/30/2017 3:32 PM
17	Please don't turn it into 138.	10/30/2017 11:27 AM
18	Another entrance to I-85 North should be installed at hwy 92. This could be an entrance only. This would help move some of the semi-truck traffic away from the 74 entrance ramp and provide another outlet to 85N.	10/30/2017 8:10 AM
19	Need to better manage the build up of traffic 74N to get on I-85 and the exit 61 offramp to get back to 74S	10/29/2017 9:44 AM

SR 74 Comprehensive Corridor Study Online Survey

20	Any improvements can be made while keeping aesthetics, which is very important. But relieving traffic congestion is imperative. There are other areas of PTC that could be utilized for beautification and shopping on the cart paths.	10/29/2017 9:39 AM
21	Please study morning and evening from Sandy Creek to and from the interstate for several days to gauge the crazy patterns and how semis affect Everything!	10/29/2017 8:39 AM
22	Please find another way of managing the mess of traffic at 74 and 85!!!! Too many trucks that affect traffic but it appears that Fairburn or the county was looking for revenue by allowing the truck stops and associated businesses to develop unbridled.. I now find other routes to avoid that intersection which is very inconvenient. Please find a way to allow truck traffic other access. Being caught in the middle of a sea of trailer trucks on top of the bridge exiting 85 to 74 is unnerving and the road and paving is in bad condition. This survey and resultant planning should have been done years ago, but am glad it is now being looked at.	10/29/2017 7:29 AM
23	I wish that highway 92 could get I85 access. That would take a lot of the burden off the i85/hwy 74 interchange. It would at least be helpful for the big trucks going to Oakley Industrial.	10/28/2017 7:26 PM
24	Widen bridge over I-85 From four to 6 lanes. Add additional turn lane to entrance of I85. Put no parking signs on entrance ramp to I-85. Add no right turn on red from Oakley Blvd to Hwy 74 at Mcdonalds	10/28/2017 6:16 PM
25	Park and Ride lot to encourage car pooling and supported by frequent bus to Atlanta / airport. Widen I-85 exit lane heading to Fairburn Make another exit for PTC and / or Fairburn just south of the current I-85 exit.	10/28/2017 12:51 PM
26	Would love to see Marta extend to fairburn and big parking lot! Down 74 to PTC would be even better.	10/27/2017 9:26 PM
27	NO WAREHOUSES	10/27/2017 9:05 PM
28	I think an exit between 61 and 64 should also be explored. This is badly needed. Redevelopment of the 74/54 exchange should also be a top priority.	10/27/2017 8:24 PM
29	Flashing warning light before bridge heading South in front of Tyrone Publix to notify oncoming traffic the light is red...	10/27/2017 6:28 PM
30	Express bus between shopping areas. Wide side walks and street lights. Benches. Preserve some green space.	10/27/2017 5:44 PM
31	I've lived in PTC since 1988 and this traffic congestion needs to be addressed to relieve the truck traffic. Fayette and Fairburn have done a terrible job in traffic mitigation along with the 54/74 intersection in PTC. Is it just time to move somewhere else?	10/27/2017 5:06 PM
32	Keep the citizens involved and engaged throughout the development process.	10/27/2017 4:11 PM
33	In addition to the 54/74 intersection, capacity especially as it relates to 18 wheelers at the 74/I 85 interchange must be addressed before someone is killed.	10/27/2017 3:52 PM
34	alternate route for trucks	10/27/2017 1:54 PM
35	in order to continue to attract business to towns that are accessed via Highway 74, we must fix this bottleneck. Otherwise, potential employers will choose another location. Also, the ever increasing traffic issue on 74 has a waterfall effect - there are now backups at Collinsworth/Palmetto exit #56 - because people are simply avoiding 74 altogether. Exit 56 definitely does not have the infrastructure to support additional traffic.	10/27/2017 1:28 PM
36	The exit is a nightmare. Poor planning in Fairburn has led to more traffic than the road can manage. What used to be a pleasant ride is now worse than my ride from Buckhead to the exit.	10/27/2017 12:52 PM
37	Please keep the fayette county portion of SR 74 beautiful. Miles of fast food restaurants is not aesthetically pleasing	10/27/2017 12:23 PM
38	The traffic lights in peachtree city from Target plaza to 54/74 interchange are terribly timed. If you hit one you hit them all. More cops patrolling distracted drivers. It is egrious what I see people doing in their cars on a daily basis. Too much semi traffic in Fairburn!!	10/27/2017 12:10 PM
39	Any changes to SR74 in Fairburn should be considered in light of the potential proposal to add a MARTA heavy rail stop at the I-85/SR-74 interchange. How should SR 74 be configured if a rail station and large parking deck was added and many commuters decide to use this instead of taking I-85?	10/27/2017 10:36 AM

SR 74 Comprehensive Corridor Study Online Survey

40	Hopefully, Fayette County will continue to maintain the aesthetics along its section of this road and not allow hodge-podge development to occur such as that along the Fulton/Fairburn section. It is congested as well as being terribly unsightly.	10/27/2017 7:06 AM
41	In addition to I-85 interchange the Hwy74 / Hwy 54 intersection in PTC needs to be redesigned to accomodate the heavy traffic. Also, consideration should be given to additional routes to avoid the intersection (ie. like McDuff Parkway or another bypass road).	10/27/2017 6:30 AM
42	The lights are not timed properly on the exit ramp to exit 61 coming from I-85 South. The specific light that is not timed properly is the light for left turns from 74S to I-85 N. This light gets backed up with tractor trailers which then backs up the left lane on 74S which then back up the ramp on exit 61. I would recommend having a signal timing engineer study this entire corridor. I understand that a continuous flow intersection is being recommended to help alleviate traffic congestion at the intersection of 74 and 54. However, I don't think this alone will alleviate the traffic issue. I suggest a flyover on 54 and a re-timing all of the lights on 54W. I understand that funding would be an issue for a flyover on 54 but I think a tolled flyover would be feasible based on the traffic conditions and the socioeconomic background of residents.	10/27/2017 5:37 AM
43	Please ensure that safety, road repairs, sanitation and community policing are a priority for the development of the west end of the corridor. Please do not over develop the area, which leads to congested roads, vacant shops/restaurants and often higher crime rates. Thank you.	10/26/2017 10:51 PM
44	Hope there is improvement in businesses and service in the Fairburn Tyrone end of 74 that families can utilize shopping and services much needed in the Fairburn area.	10/26/2017 12:01 PM
45	The road is terrible there at the exit with potholes because the semi-trucks weigh so much	10/26/2017 11:09 AM
46	Unfortunately, in my opinion, the Fulton County portion of the 74 corridor is a lost cause and nothing can be done to correct the damage.	10/25/2017 3:21 PM
47	Fayette County Commissioners need to communicate with Coweta, Clayton, Fulton that they are part of problem and help to resolve it. 74 and 54 has become a choke hold as is 74 and Interstate 85. How about some clover leafs off of the interstate vs. lights. How about the distribution centers having their own ramp onto the Interstate 85. How about stop rezoning AG to residential. People moved here not to urbanized.	10/25/2017 2:37 PM
48	Please fix the I-85 exit to SR 74.	10/24/2017 6:35 PM
49	54/74 intersection is also terrible, especially when cars try to sneak through on yellow/red clogging the intersection causing gridlock.	10/24/2017 9:41 AM
50	Serious concern for Sandy Creek Road and the constant usage with truck traffic to Pinewood Studios. This two lane road was not designed for this type of truck or high speed that is currently being used. How do we utilize the highways through the County to accommodate the trucks? (Especially with the anticipated development of another movie studio in Tyrone and the proposed office park on 54 (accessible via Veterans Pkwy or Tyrone Rd). I do not share the spoken concerns of traffic coming from Clayton (54 widening) because Fayette citizens also use that route to gain access to other counties and highways, but I am concerned for commercial traffic as it does not appear we are being forward thinking in accommodating this type of traffic - just look at Veterans Parkway and the anticipated growth there on a two lane road.	10/24/2017 7:24 AM
51	Time to step it up. The area is falling behind and solutions need to be real.	10/23/2017 9:04 PM
52	The intersection of 54/74 is terrible. There are improvements that could be made immediately: Eliminate right turn on red & yield signs. Right turn lanes need to have a red/yellow/green turn arrows-utilizing red arrows to allow for opposite traffic who have green left turn arrow. And no U-turns allowed at 54/74. No U-turns at 54/Market Place Blvd signal or at 74/Kelly Drive signal as the elevation for approaching traffic makes it unsafe to judge on-coming traffic.	10/23/2017 8:23 PM
53	The 74 corridor desperately needs public transportation. Perhaps with limited stops but terminating at the airport MARTA station. This is not a popular idea because it is felt that it would bring "them" into our area. How horrible in this day in age. We are cutting ourselves off from becoming a modern, progressive successful area. No one likes the traffic problems when they commute every day. It would be lovely and safer to ride a commuter train and do the emails/texts in comfort.	10/23/2017 5:38 PM
54	Dont believe alternative travel modes like pedestrian, bicycle will even work on this segment of 74. Mass transit may but I doubt I would use mass transit to get to the airport because it probably will take me the same amount of time if not more to ride mass transit from Peachtree City to the Atlanta Airport.	10/23/2017 5:02 PM

SR 74 Comprehensive Corridor Study Online Survey

55	It's fairly obvious something needs to be done in the long run at the intersection of 54 and 74. Perhaps 74 should be dropped to pass under 54?	10/23/2017 2:16 PM
56	Don't encourage more development along the road. That would destroy it's character and create even more traffic. Especially don't enable more truck stops or warehouses to be built unless alternative access roads off the interstate are built.	10/23/2017 1:16 PM
57	There is simply too much traffic getting into 74 to reach I-85. Providing alternative entries onto the interstate and changing the traffic patterns at the interstate are needed and soon!	10/23/2017 12:12 PM
58	NO PUBLIC TRANSIT ALONG 74, UNDERSTAND? NONE. EVER. Fast track fixes at 54/74 intersection. It cannot wait till 2020 and beyond to start construction. Find a new east west solution to Fayette County traffic congestion. An east/west bypass is needed to lessen the load on 54. Do NOT consider Crosstown Dr. in Peachtree City as an option for cross county traffic solutions. Start by encouraging retail in Fairburn/Fulton County just south of I-85 along 74. That alone would eliminate thousands of vehicles from driving south on 74 into Peachtree City to shop on 54 west and would localize those shoppers to the area where they live.	10/23/2017 11:37 AM
59	Speed limits are not being enforced properly.	10/23/2017 11:23 AM
60	stop allowing more busnisess and housing devolpments. More churches (they are mostly used one dat a week	10/23/2017 11:20 AM
61	Commuter train to airport and downtown Atlanta?	10/23/2017 10:40 AM

The diagram illustrates the traffic flow and control signals between SR 74 (Southbound) and Wisdom Rd (Eastbound and Westbound). It shows the flow of vehicles from SR 74 onto Wisdom Rd and back. Arrows indicate the direction of traffic flow, and red numbers show the count of vehicles for each peak hour period.

APPENDIX D: DETAILED DEVELOPMENT GUIDELINES MATRIX

	City of Fairburn (Some requirements from GA Hwy. 74 Overlay District)	Town of Tyrone (Some requirements from Quality Growth Development District)	City of Peachtree City
Setbacks			
Front	50'; 50' from each street ROW on corner lots	O-I, C-1 = 80'; C-2 = 50'; M-1, M-2 = 100'	LC, OI, GC, LUC = 40'; LI = 30'; GI = 50'
Side	20' O-I = 8'; C-1, C-2, M-1, M-2 = 20'		LC, OI, GC, LUC = 10' (75' adjacent to residential); LI, GI = 20' (100' adjacent to residential)
Rear	30'	30'	LC, OI, GC, LUC = 20' (75' adjacent to residential); LI = 20' (100' adjacent to residential); GI = 50' (100' adjacent to residential)
Greenspace	<1 acre disturbance = min. 30% of site ; < 1 acre disturbance and provide variety of site amenities = min. 20% of site; <1 acre with site amenities and link to similar areas on adjoining property = 10% of site; Grading <50% or installing drainage requiring piping above 18" in diameter = 30% open space; Preserve natural drainage swales and associated areas in permanent natural settings = 20% open space; Preserve natural drainage swales and associated areas in permanent, natural settings which link to natural drainage routes on adjoining properties = 10% open space; Sites encompassed by natural water features, floodplains, greenbelts, and/or wetlands may be credited toward open space	Required in all residential developments	Encourage preservation of greenspace and other conservation areas; coordinate site design plans, which include greenspace, with the County's greenspace protection plan
Easements	20' for single utility; 10' for each additional utility for common easement; permanent and construction easements must be at least 25' from top of stream bank	Minimum width of 10'; permanent and construction easements must be at least 25' from top of stream bank	Minimum width of 10'; permanent and construction easements must be at least 25' from top of stream bank

	City of Fairburn (Some requirements from GA Hwy. 74 Overlay District)	Town of Tyrone (Some requirements from Quality Growth Development District)	City of Peachtree City
Aesthetic Standards	Exterior - Brick or autoclaved concrete substructure; stone (no quarry faced stone allowed); concrete masonry; wood/glass in combination with metal or similar, durable architectural materials; limited use of standing seam metal permitted in combination with listed materials. Side and rear elevations of all restaurants and office buildings shall be majority brick or stone and substantially consistent with front building elevation. Single architectural style per site; form and pitch of roof shall be substantially proportional to chosen architectural style.	Exterior construction shall be 80% brick, veneer, or glass; exterior walls must be designed to provide visual relief at a minimum of every 20 feet	https://library.municode.com/ga/peachtree_city/codes/code_of_ordinances?nodeid=PTIICO_OR_APXBLADEOR_ARTVIGEDESTDEGU_DIV4STRECOINBUDE
Building Standards	Int'l Building Code 2012; Int'l Residential Code 2012; Int'l Plumbing Code 2012; Int'l Mechanical Code 2012; Int'l Fuel Gas Code 2012; Int'l Energy Conservation Code 2009; National I Electrical Code 2014; Int'l Property Maintenance Code 2012; Int'l Existing Building Code 2012; National Green Building Standard 2008; Int'l Swimming Pool and Spa Code 2012	Adopts codes in OCGA by reference	Adopts latest edition of codes as adopted and amended by DCA
Facade Standards	All front facades of principal structure shall be brick; visual relief every 80' - 120' via setbacks, parapet breaks or other architectural element; canopies shall provide visual relief with a break every 40'	Exterior construction shall be 80% brick, veneer, or glass; exterior walls must be designed to provide visual relief at a minimum of every 20 feet	See Aesthetic Standards
Development Standards	Retail/commercial developments = 35' min. landscaped buffer adjacent to Hwy. 74 ROW; 75' min. landscaped buffer adjacent to office use; 100' min. landscaped buffer adjacent to residential use; Office developments = 45' min. landscaped buffer adjacent to Hwy. 74 ROW; 40' min. landscaped buffer adjacent to residential use; Residential developments = 45' min. landscaped buffer adjacent to Hwy. 74; Underground utilities required.	Maintained, planted buffer shall be in place for the first 20' of the building setback which is adjacent to Hwy. 74	SR 74 - Continuous 60' wide tree save/landscape buffer for non-residential development; min. 100' wide city owned greenbelt buffer for residential development

	City of Fairburn (Some requirements from GA Hwy. 74 Overlay District)	Town of Tyrone (Some requirements from Quality Growth Development District)	City of Peachtree City
Site Plan Standards	Drawn to scale of not less than 100' = 1"; maximum sheet size 36" x 48"; minimum sheet size 17" x 22"; location map at scale of 600' = 1"	Drawn to scale of not less than 100' = 1"; sheet size 17" x 22"	24" x 36" and one 11" x 17" reduction, one pdf on CD
Gross Land Area	C-2 General Commercial District (predominant zoning along Hwy. 74) requires 1/2 acre	O-1 = min. lot width 125'; C-1, C-2 = min. 1 acre/min. lot width 100'; M-1, M-2 = min. 1 acre/min. lot width 125'	LC, OL, LL = 20,000 sq. ft.; GC, LUC = 30,000 sq. ft.; GI = 80,000 sq. ft.
Block Area and Length	None	Suggested that blocks shall not be greater than 1,800 ft. nor less than 600 ft. in length	Suggested that blocks shall be not greater than 1,800 ft. nor less than 600' in length
Signage Standards	C-2 Zoning - One freestanding or monument sign, max. 50 sq. ft., max. height 20', wall signs max. 10% of gross wall area or 150 sq. ft.; Planned Centers in C-2 Zoning - max. 100 sq. ft. freestanding or monument sign for each street frontage, max. height 20', wall signs max. 10% of gross wall area or 150 sq. ft.	One freestanding sign per parcel - max. 6' height, 10' width, not to exceed 40 sq. ft. in area; multiple businesses on parcel - one freestanding sign, max. 7' height, 10' width, not to exceed 60 sq. ft. in area; external illumination only; one wall sign not to exceed 1.5 sq. ft. per linear foot of the front length of building, if linear frontage of a bldg. or portion thereof occupied is 100' or less, the max. size of a wall sign is 70 sq. ft.; if linear frontage of a bldg. or portion thereof occupied is in excess of 100', max. size of wall sign is 150 sq. ft.	https://library.municode.com/ga/peachtree_city/codes/code_of_ordinances?nodeId=PTIICO_OR_CH66SI_ARTIIRESIZOCLOUD66-15RECOOFINLCGCLUOILIGILU
Parking	Retail/commercial = 1 space per 200 sq. ft.; 4.5 spaces/1000 sq. ft. for storage, assembly, warehousing or other purpose open to public; 1 space per 1,000 sq. ft. of floor area used for storage, assembly, warehousing or other purpose closed to the public	Varies by use - business, professional offices and clinics = 1 space/250 sq. ft. of gross floor area; commercial, manufacturing, and industrial = 1 space/2,000 sq. ft. of gross office, plant, and storage area; general business, commercial, shopping centers, personal service establishments = 5.5 spaces/1,000 sq. ft. of gross floor area; restaurants, night clubs, taverns - 1 space/75 sq. ft. of gross floor area	https://library.municode.com/ga/peachtree_city/codes/code_of_ordinances?nodeId=PTIICO_OR_APXAZO_ARTIXGEPR_S909OREAUPARE

City of Fairburn (Some requirements from GA Hwy. 74 Overlay District)	Town of Tyrone (Some requirements from Quality Growth Development District)	City of Peachtree City
<p>Access to Hwy. 74 limited to one driveway per existing parcel; lot coverage bonus of 10% granted for consolidation of driveways currently permitted by GDOT; developers encouraged to create secondary road networks through system of density (lot coverage or building height) bonuses, lot coverage ratios inclusive of the building footprint and pavement for parking and driveways shall not exceed 75%, pavement comprising internal street networks shall be exempted provided such street networks channel traffic between developments along Hwy. 74 and are not directly linked to Hwy. 74; secondary road networks which provide a landscaped boulevard and are linked to adjoining properties shall entitle the property owner to a lot coverage bonus of 10%</p> <p>Access Management</p>	<p>All entrances and exits of any public or private street or drive onto any state highway must be approved by GDOT and the Tyrone Town Council prior to issuance of a development permit.</p>	<p>Interparcel site access should be provided when land uses are compatible; common access easements for shared driveways along state highways and busy streets are encouraged.</p>
<p>Service and Loading Standards</p>	<p>No loading areas permitted between buildings and Hwy. 74</p>	<p>Retail with >2,000 sq. ft. - none; retail with <2,000 sq. ft. - 1 space per 25,000 sq. ft.; industrial and institutional - 1 space for first 25,000 sq. ft and 25,000 - 99,999 = 2 spaces, 100,000 - 159,999 = 3 spaces, 160,000 - 239,999 = 4 spaces, 240,0000 - 349,999 = 5 spaces, above 350,000 sq. ft. = one additional space/100,000 sq. ft.</p>

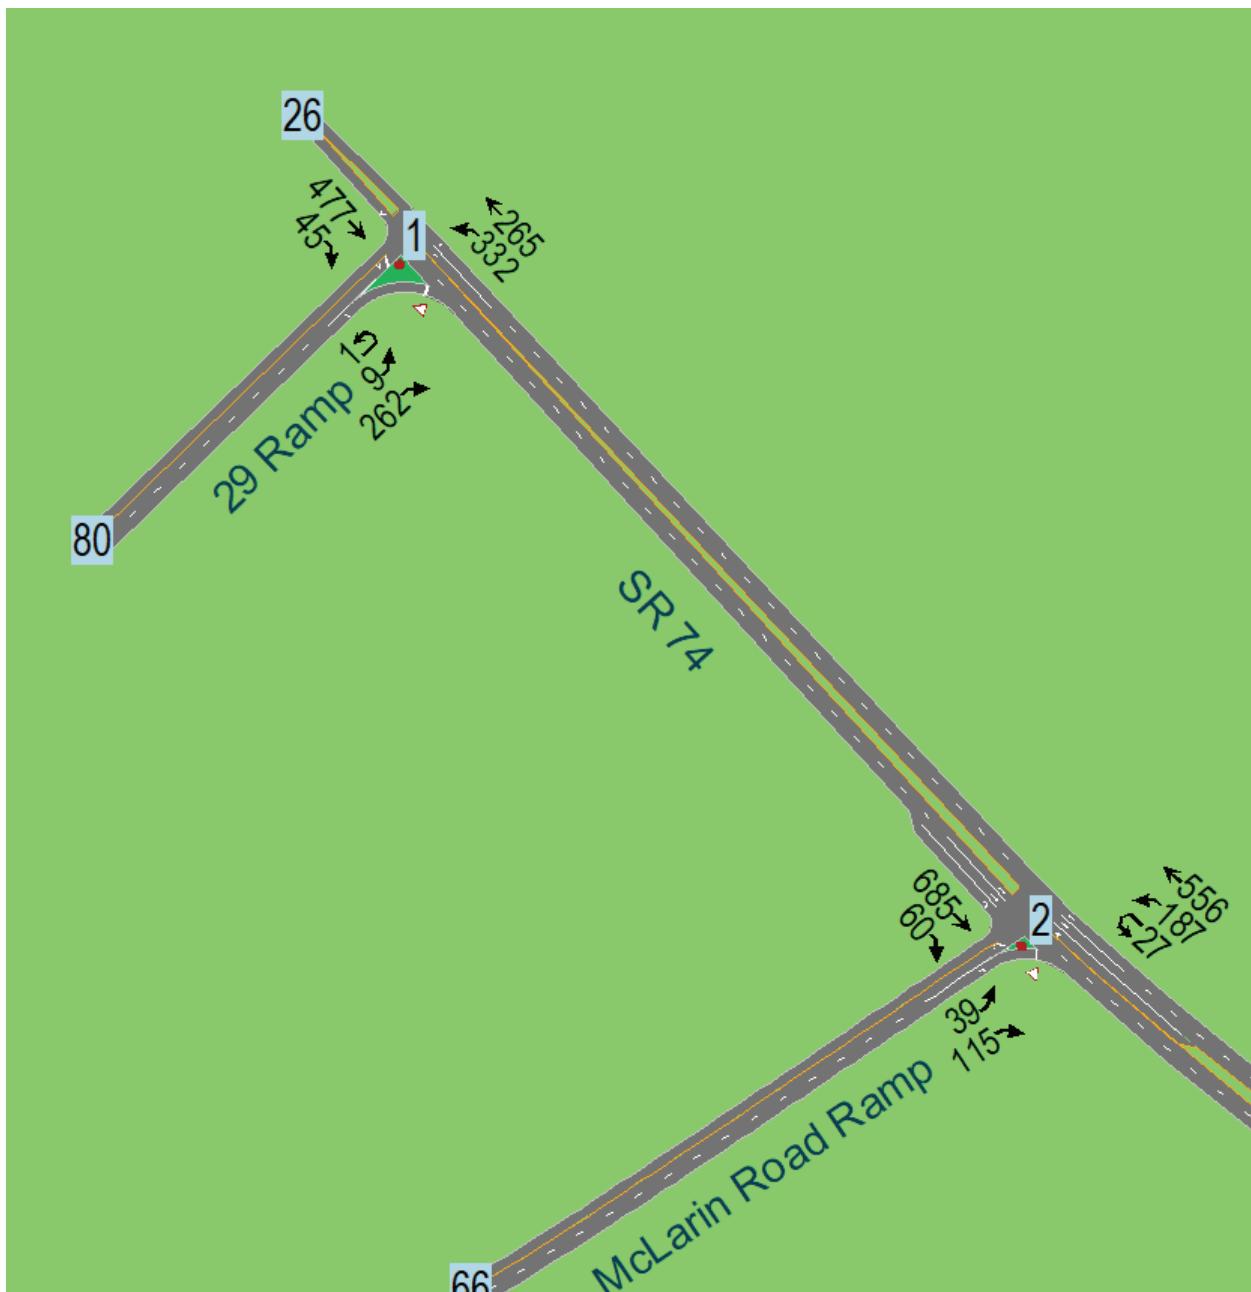

City of Fairburn (Some requirements from GA Hwy. 74 Overlay District)	Town of Tyrone (Some requirements from Quality Growth Development District)	City of Peachtree City
<p>Tree density standard of 20 units/acre or one unit/2,000 sq. ft. of proposed impervious area; all vehicle use areas shall provide a Perimeter Landscape Area with no horizontal dimension less than 5' and min. one tree/250' of landscape area or fraction thereof; Perimeter Landscape Areas abutting a public street ROW shall have min. dimension of 10' from ROW line to vehicular use area; all areas of public roadway ROW shall be grassed. Interior Landscape Areas shall = 10% of total vehicle use area, exclusive of perimeter landscape areas; interior landscape areas shall have a min. horizontal dimension of 10'; a min. of one tree/250' or fraction thereof of interior landscape area shall be provided; for any parking area that is designed for more than 10 vehicles, plan must provide for landscaped islands and/or peninsulas at least 10' in width so that no more than 12 adjacent parking spaces exist without a landscaped separation.</p> <p>Landscaping Standards</p>	<p>All side and rear yards shall be used for planted buffers and/or landscaping utilizing berms as feasible; all areas not devoted to structures, site development features, and natural vegetation shall be landscaped; one canopy tree with min. trunk caliper of 2.5" (at 4" from ground) and one understory tree with min. trunk caliper of 1" (at 4" from the ground) for every 1,000 sq. ft. of permanently disturbed area on the site; all landscape areas within parking lots shall be 100% landscaped with deciduous trees, shrubs, ground cover (not requiring mowing) and/or flowers in mulched beds; perimeter designed to accommodate >20 vehicles are not required to install interior landscape areas; parking areas designed for <20 vehicles must install interior landscaped areas so that no more than 12 adjacent parking spaces exist without a landscaped separation of at least 5' in width; screening shall be used as a buffer between incompatible uses, and to reduce effects of headlight glare, noise and other objectionable activities*</p>	<p>No more than 12 parking spaces to be located in continuous row without planting island, internal island min. 10' wide, end island min. 12' wide; planting islands shall be 100% landscaped with canopy trees, understory trees, evergreen shrubs and/or groundcover in mulched beds; perimeter of parking lots shall be landscaped with evergreen plant material; planting area min. of 10' shall separate all parking lots, driveways, and/or service courts from adjoining property line; planting areas shall be landscape; parking areas designed for <20 vehicles shall be located in front of (10' wide) and on sides (6' wide) of retail, commercial, and industrial buildings</p> <p>https://library.municode.com/ga/peachtree_city/codes/code_of_ordinances?nodeId=PTIICO_OR_APXBLADEOR_ARTVIGEDESTDEGU_DIV3S_TSTD_E_6COSTOTRI-W</p>

GDOT ICE STAGE 2: ALTERNATIVE SELECTION DECISION RECORD

ICE Version 2.14 | Revised 07/20/2018

GDOT PI # (or N/A) 0000000

County: Fayette

Project Location: SR 74 @ Wisdom Rd

Existing Intersection Control: Signal (turn lanes on mainline)

GDOT District: 3 - Thomaston

Area Type: Suburb/Transition

Date: 8/9/2018

Agency/Firm: ARCADIS

Analyst: Jonathan Reid

Type of Analysis: Conventional Non-Safety Funded Project

Opening / Design Year Traffic Operations

Intersection meets signal/AWS warrants?	Meets Signal Warrants	
Traffic Analysis Measure of Effectiveness	Intersection Delay	
Traffic Analysis Software Used	--select one--	
Analysis Time Period	AM Peak Hr	PM Peak Hr
2022 Opening Yr No-Build Peak Hr Intersection Delay	11.7 sec	38.1 sec
2022 Opening Yr No-Build Peak Hr Intersection V/C ratio	0.00	0.00
2040 Design Yr No-Build Peak Hr Intersection Delay	20.1 sec	143.9 sec
2040 Design Yr No-Build Peak Hr Intersection V/C ratio	0.00	0.00

Complete Streets Warrants Met?	
<input type="checkbox"/> PEDESTRIANS	
<input type="checkbox"/> BICYCLES	
<input type="checkbox"/> TRANSIT	

Crash Type	Crash Data: Enter 5 most recent years of intersection crash data			Crash Severity
	PDO	Injury Crash*	Fatal Crash*	
Angle	12	11	0	29%
Head-On	0	0	0	0%
Rear End	29	11	0	51%
Sideswipe - same	8	1	0	12%
Sideswipe - opposite	0	0	0	0%
Not Collision w/Motor Veh	5	1	0	8%
TOTALS:	54	24	0	78

* Number of crashes resulting in injuries / fatalities, not number of persons

Alternatives Analysis:

Proposed Control Type/Improvement:	Alternative 1	Alternative 2	Alternative 3	Alternative 4	Alternative 5
	Traffic Signal	Continuous Green-T			

Project Cost: (From CostEst Worksheet)

	Turn Lane Improvements		Additional description here	
Construction Cost	\$225,000	\$400,000		
ROW Cost	\$0	\$50,000		
Environmental Cost	\$0	\$0		
Reimbursable Utility Cost	\$17,000	\$12,000		
Design & Contingency Cost	\$119,000	\$90,000		
Cost Adjustment (justification req'd)	0%	0%		
Total Cost	\$361,000	\$552,000		

Traffic Operations:

Traffic Analysis Software Used	Synchro 9		Synchro 9				
	AM Peak Hr	PM Peak Hr	AM Peak Hr	PM Peak Hr			
	14.7 sec	48.1 sec	13.5 sec	42.0 sec			
	0.00	0.00	0.00	0.00			

Safety Analysis:
